# XTREME ENERGY™ DLC FLAT TAPPET LIFTERS

Tappets feature a Diamond-Like Coating (DLC) face that forms an extremely hard, tough and high-lubricity surface to reduce friction at the Cam lobe/lifter interface, extending lifter and Camshaft life significantly.

**NEW!**

Part No.  
310103012

## Key Features:

- + DLC: Diamond-Like Carbon
- + Wear-resistant
- + High lubricity
- + Cast-iron and steel camshaft compatible
- + Outstanding performance in Spintron durability testing simulation of an entire racing season
- + Excellent alternative to hard-to-find standard lifters

Visit [nickelsestore.com](http://nickelsestore.com)

## Section 1: Engine Components ..... 6

Looking for more engine performance? These suppliers can help with engine blocks to radiators, and oil pumps to intake manifolds—everything to unlock potential with the necessary engine parts.

## Section 2: Chassis, Driveline & Suspension Components ..... 84

These suppliers specialize in transferring power efficiently and effectively. When completing the race car matters most, these components will come in clutch.

## Section 3: Racing Components, Accessories & Services ..... 114

All race car builds need ancillary products or services to be effective in a race season. These companies provide all the right racing components or services aimed to improve the race program.

## Section 4: Machinery, Tools & Equipment ..... 142

New equipment can increase efficiency, improve productivity, and enhance the bottom line. Check out specialized machinery and equipment that excels in honing, welding, cutting, grinding, and more.

## Section 5: Race Track Equipment & Supplies ... 160

As each race season comes to an end, track promoters seek to improve the upcoming season. This section can assist programs with upgrades surrounding concessions, track equipment, maintenance, and more.

## Section 6: Sanctioning Organizations..... 162

These governing bodies aim to organize, create, enforce, and oversee the rules and standards, advocating the longevity and safety for all those involved in motorsports.

## Section 7: Manufacturers' Representatives ..... 172

From tracking industry trends to raising awareness of new products emerging in the market, these manufacturers' representatives provide the invaluable link between vendors and racing operations that sell their components.

## Section 8: Warehouse Distributors ..... 176

Warehouse distributors can serve as valuable resources to motorsports business operations, a number of which offer multiple locations, same-day shipping, online inventory tracking, customer service reps, and much more.

## Section 9: Suppliers Index..... 178

Reference and contact information for hundreds of leading product suppliers representing all forms of motorsports.

## DEPARTMENTS

Performance Industry Reps ..... 188

Advertisers Index ..... 189

# RACE-READY. STREET FRIENDLY.

Unlock Maximum Power with the VRS-4150

**Edelbrock**

The VRS-4150 Race and Performance Carburetor (950 CFM) is engineered for serious performance enthusiasts, racers, and builders who demand ultimate control and power. Designed for high-horsepower engines, it delivers unmatched throttle response and fuel delivery for both track and street.

Part No.  
1309

**NEW!**

## VRS-4150 Race & Performance Carburetor

### Key Features:

- + 1.562" Venturis and Large Annular Boosters — Superior airflow and fuel atomization
- + Four-Circuit Billet Metering Blocks — Infinite tuning capability
- + 20% Larger Float Bowls and Baffling — Provide stability and capacity under harsh conditions
- + Dual 50cc Accelerator Pumps — Instant throttle response
- + Fits All 4150 and 4500 Manifolds — Universal performance fit

# ENGINE COMPONENTS

Looking for more engine performance? These suppliers can help with that. From engine blocks to radiators, and oil pumps to intake manifolds, unlock performance potential with the necessary engine components. Boost past the competition in the 2026 race season.

**NOW AVAILABLE AT  
ATECH MOTORSPORTS &  
NICKELS PERFORMANCE!**

Engine Works has been a trusted name in the performance racing industry since 1995. Our commitment to delivering high-quality, high-value, and high-performance products has made us a go-to brand for racers and engine builders alike. With a focus on sourcing USA-made products ranging from engine parts, driveline components, and many other performance upgrades, we ensure that our customers receive the best products at the best prices.

*Since the 1970's, our team at Nickels Performance Distributors has been dedicated to providing top-quality parts and exceptional service to ensure our wholesale customers have everything they need to achieve their performance goals!*

# AEROMOTIVE

aeromotiveinc.com | 913-647-7300

**AEROMOTIVE**

## PART NUMBER #19130-19133

The new Aeromotive In-Tank Brushless Fuel Pump System for the 2014–2019 C7 Corvette is a direct drop-in upgrade that delivers modern efficiency and performance. Featuring a single pump design, true variable speed control, a remote-mounted controller, and an integrated 100-micron pre-filter, it offers cleaner, simpler, and more reliable fuel delivery.

# F-SERIES ENGINE BEARINGS

The best got even better!

## BENEFITS OF THE F-SERIES ENGINE BEARING:

- + Testing has shown a 126% increase in load carrying capacity before seizure vs conventional copper/tin/lead overlay bearings

Bearing Type	PSI	F-Series PSI	Increase
Conventional	13,779	31,183	126%
Coated	30,095	31,183	5%

- + Increased fatigue strength & wear resistance overlay
- + Higher seizure resistance over a coated bearing with no additional thickness
- + Ramp and pad designed thrust face (when applicable)
  - 93% thrust load increase versus flat pad thrust design
  - 1,821 lbf versus 944 lbf

## CHEVROLET V8 LS

Part No.	Application	Qty	Description	Notes
CB-663FN	LS1, LS6 / 6.0L LS2, 6.2L LS3 Engines	8	F Series Rod Bearing Set	Narrowed
CB-663FXN	LS1, LS6 / 6.0L LS2, 6.2L LS3 Engines	8	F Series Rod Bearing Set	X - .001 Extra Oil Clearance / Narrowed

MS-2411F	LS1, LS6 / 6.0L LS2, 6.2L LS3 Engines	1	F Series Main Bearing Set	
MS-2411FX	LS1, LS6 / 6.0L LS2, 6.2L LS3 Engines	1	F Series Main Bearing Set	X - .001 Extra Oil Clearance

CALL FOR OTHER APPLICATIONS

# MAHLE

The F-series bearing is a TriMetal™ lead-tin-indium-alumina electroplated overlay applied over MAHLE's cast bronze lead substrate for maximum performance and reliability. The added ramp and pad thrust face creates increased oil pressure to the thrust wear surface which increases lubrication and bearing cooling; resulting in an ability to withstand a higher thrust load than conventional flat thrust surfaces.

**aFe POWER**

afepower.com | 951-493-7100

**aFe MAGNUM FLOW PRO 5R AIR FILTER-2025 RAM 1500 RHO 3.0L**

This high-flow, oiled OE replacement filter outperforms the stock air filter by over 32%, enhancing horsepower and torque. Made with an injection-molded top and a carbon fiber-reinforced polyurethane base, the Magnum FLOW features five layers of pre-oiled cotton gauze for maximum performance and protection, even when dirty. Ideal for street or track use, the Pro 5R filters are washable and reusable, and are also available in Pro DRY S, non-oiled filter media for convenience. Pro 5R PN: 10-10409R. Pro DRY S PN: 10-104090.

**aFe ROUND RACING AIR FILTER W/ PRO GUARD 7 MEDIA**

This Pro GUARD 7 air filter measures at 20.75 L x 14.25 W x 6.0 H inches and features seven layers of hybrid media, formed with deep, open pleats for outstanding dust holding capacity, greater airflow, and maximum protection for large-size competition engine use. One-hundred percent polyurethane bump-seal end caps and built-in expanded metal to retain shape and a protective seal. The patented combination of oiled cotton gauze with synthetic material allows this media to thrive in the dust and dirtiest environments. PN: 18-82007G.

**MOMENTUM HD COLD AIR INTAKE FOR 2020-2025 GM DIESEL 6.6L L5P**

This Momentum intake for the L5P features a patented filter-to-housing interface to accommodate a large 9-inch pre-oiled Pro 10R media performance air filter, for optimal performance and filtration. It features reinforced metal to ensure filter frame rigidity. Combined with the roto-molded housing, utilizing the factory air scoop inlets allows for 56% more airflow. The results are dyno-proven gains of 16 HP, +44 lbs. x ft. torque. Available with dry or oiled filter media. PN: 50-70056T.

**TRACK SERIES CARBON FIBER COLD AIR INTAKE FOR 2025-2026 RAM 1500 RHO 3.0L**

Designed from the ground up for the RAM 1500 RHO, the aFe POWER Track Series Air Intake System delivers uncompromising performance, cutting-edge materials, and factory-level fitment. This intake is purpose-built to unlock the full potential of your high-output Hurricane engine with increased airflow, refined aesthetics under the hood, and weight reduction. Dyno-proven power gains of +19HP and +31 lbs. x ft. Torque delivers performance and appearance. Available with dry or oiled air filter media. PN: 57-10032K.

# ARP (AUTOMOTIVE RACING PRODUCTS)

arp-bolts.com | 800-826-3045

## AUDI 2.5L TFSI INLINE 5 CUSTOM AGE 625+ HEAD STUD KIT

This kit consists of 12 ARP Custom Age 625+ Head Studs that are centerless ground for increased concentricity, heat-treated prior to thread rolling and machining for increased fatigue strength. It also includes 12 ARP 12-pt. Flange Nuts and 12 - ARP Cat's Paw Washers. Made from 8740 hardened chromoly steel. The block side has a textured pattern that helps prevent washer spin during tightening to specified torque. 8740 chromoly rated at 190,000, psi rated at 260,000 psi minimum tensile strength (ARP Kit # 404-4708).

## GMC 6.6L DURAMAX L5P, CAP SCREW ROD BOLT KIT (ARP KIT # 230-6302)

This kit contains 16 ARP2000 Rod Bolts that are centerless ground for increased concentricity. They are heat-treated prior to thread rolling and machining for increased fatigue strength, and rated at 220,000 psi minimum tensile strength.

## RING COMPRESSOR 86.25 MM (ARP KIT #901-8625)

ARP's ring compressors are CNC-machined from 6061-T6 billet tube material and feature a true radius for each different bore diameter. It incorporates a wire O-ring relief. Type 3 anodizing is used for long life, and the bore size is prominently engraved in 3/4-inch high numbers for easy identification. Standard stocking sizes from 3.552 to 4.750 (SAE) and 75 mm to 95.5 mm (metric). True radius design is superior to conventional "tapered" devices.

## ARP 135-7903 BIG BLOCK CHEVY OIL PUMP DRIVE FOR .400 RAISED CAMSHAFT

Made from premium grade 8740 and heat-treated to 190,000 psi, ARP uses a unique manufacturing process where the alignment sleeve is roll formed onto the shaft (not welded or pinned), enabling the sleeve to float, allowing for slight misalignment.

# BTR BRIAN TOOLEY RACING

briantooleyracing.com | 888-959-8865

## BTR CAMSHAFTS

Brian Tooley Racing grinds quality camshafts for many popular late model engines including LS, LT, Lvx (V6 LT), Gen 3 Hemi, Ford Godzilla and more. Unique cam cores for superior heat-treatment, Landis grinders, REM micro-finishing, and test all the company's lobe designs on the dyno and the Spintron for peak performance.

## BTR VALVE COVERS

BTR valve covers for the LS engine are made in the USA. Castings are machined by BTR in Kentucky and are powder coated for a long, durable service life. Covers feature great rocker clearance, internal baffling, and AN ports in all four corners. Couple with ICT P/N 551326 to fit LT engines. Available in multiple colors, logo options, and with or without space saving coil mounts.

## BTR HYPERDRIVE SYSTEM

BTR's compact, clean, and efficient bracketless design keeps the focus on your engine—not your accessories—while True Black components and optional billet pulley and tensioner dress-up kits deliver a sleek, finished look. Each kit includes everything needed—adapters, gaskets, belt, thermostat, water and power steering pumps, hardware, and pulleys—perfect for LS and LT swaps. Available in True Black and natural finishes.

## BTR INTAKE MANIFOLDS

The BTR Equalizer intake for cathedral and square port LS was BTR's first intake featuring a space-saving underhung plenum, short runners for very high rpm or boosted setups, and a removable plenum lid for porting and direct port runner access. The Trinity lineup for LS, LT, Godzilla, and Gen 3 Hemi platforms feature a three-piece design with interchangeable length and optional dual injector runners for tuning and upgrades.

## Robins Plato Boring

### Inventor's Note

Creators of the Rubi Plato Boring System.

Every great innovation begins with a simple question: "Can we do it better?". The Rubi Plato System was born from our vision to redefine cylinder boring - achieving true bore geometry within 0.0001" straight from the boring machine, minimizing post-honing, and delivering micron-level precision consistently. By integrating temperature-compensated spindle stability, controlled reverse plato boring cycle, cross-hatch & plateau-ready cylinder bores.

The system produces bore geometry in line with top tier elite racing engine tolerances.

**Rubi Plato is more than a machine** - it is a commitment to engineering integrity, efficiency and excellence. From high-performance to high end racing engine rebuilds, it allows builders to push the limits of power and durability while maximizing precision. Our goal has always been to create solutions that inspire confidence, pride, and performance in every engine that passes through a **Robins machine**.

**ROBINS....always innovating !!**

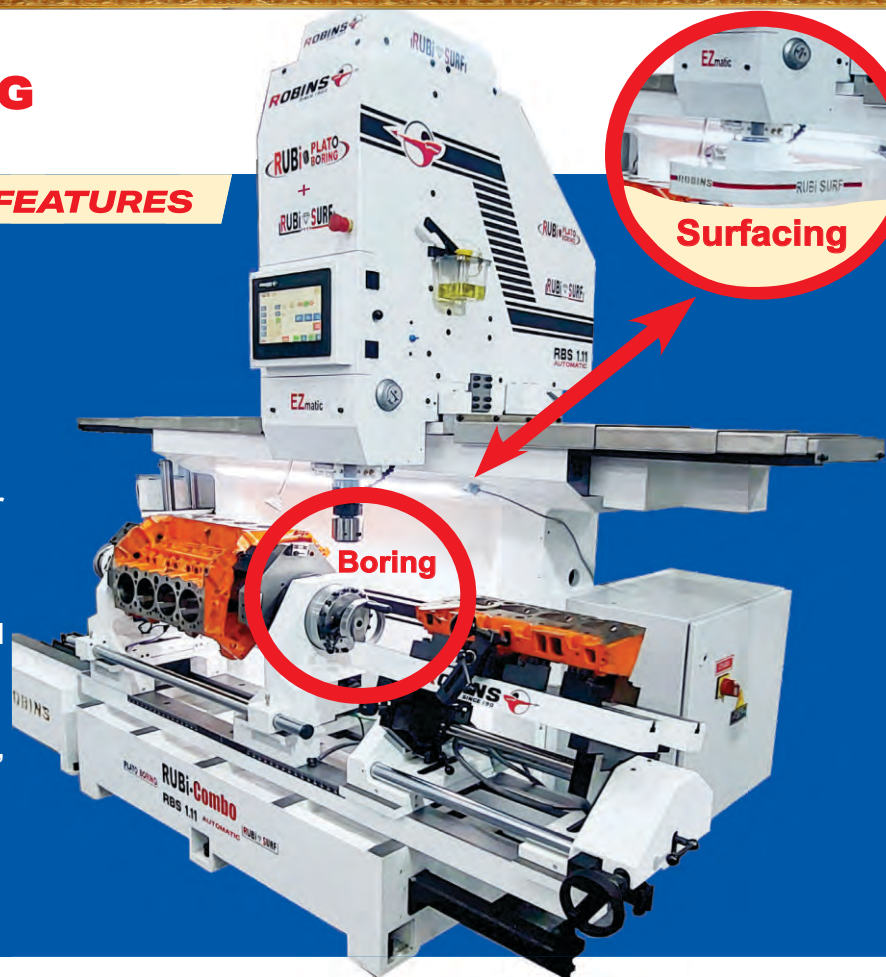

- Robin Chera and his R&D team —  
Inventors, Rubis Plato Boring (US Patent pending)

## SWITCH FROM PLATO BORING TO SURFACING IN FEW SECONDS

### RUBI RBS 1.11 EZMATIC

#### FEATURES

- Hole-to-Hole Automatic Plato Boring reduces honing time by up to 90%
- All Fixtures stay on the machine while boring and surfacing – float on air
- Bore and Surface complete V block without lifting the block off the roll over fixture
- Internal coolant system offers improved surface finish and longer tool life
- Bore and Surface automotive and large diesel blocks and heads up to 47" in length
- Cylinder bore and counterbore from 1.5" to 8.0" diameter

## CP-CARRILLO

cp-carrillo.com | 949-567-9000

### BUSHED PISTONS

Our bushed piston design incorporates a precision shrink-fit bushing inside the pin bore, we isolate the high-load, high-friction contact between the pin and bore from areas exposed to tensile stress. Installed with interference, the bushing remains under compression—delivering added strength, stability, and long-lasting performance.

### BANSHEE PISTONS

Our Banshee pistons are engineered from premium forgings to handle extreme cylinder pressures, high rpm, and the harsh conditions of racing. Forged pistons offer superior grain structure and strength, ensuring they can take the abuse of aggressive tuning, and high-horsepower builds.

### FOUR-CYLINDER HONDA K24 ALUMINUM HD CON RODS

Re-designed and engineered for extreme horsepower. 5.974 center-to-center, 0.010 shorter than stock, 7/16-inch bolts, roller burnished pin bores, floating bolt washers, and can be matched up with SC80461 Heavy Duty 10.5:1 CP.

### REVAMPED SHELF PISTON PRODUCT LINE

These pistons are being upgraded with Profiled Pin Bore Technology. This advanced design adds trumpet shapes to the pin bore, helping distribute and reduce peak stress and contact loads. The result? Better performance under extreme conditions and longer life with reduced wear.

# DAIDO METAL USA

daidometal.com | 248-893-2454

## HI-PERFORMANCE V-SERIES SBC MAIN BEARING SET MS6200V

High-performance tri-metal bronze, lead-indium main bearings designed for SBC applications. Available in X, STD, and .001 sizes. These bearings utilize three-piece assembled rear main flange bearings, engineered to provide optimum material properties across the bearing shell and thrust surfaces. Tested within top-tier motorsports environments for strength, conformability, and anti-seizure properties.

## HI-PERFORMANCE V-SERIES LS/LT/SBC ROD BEARING SET RS5319V

High-performance tri-metal bronze, lead-indium rod bearings designed for LS/LT/SBC applications. Available in X, STD, .010, .011, .020 sizes. These bearings are built for high load carrying capacity and seizure resistance under low oil film conditions. Tested within top-tier motorsports environments for strength, conformability, and anti-seizure properties.

## HI-PERFORMANCE V-SERIES LS MAIN BEARING SET MS6500V

High-performance tri-metal bronze, lead-indium main bearings designed for GM LS applications. Available in X, STD, and .001 sizes. These bearings utilize three-piece assembled main flange bearings, engineered to provide optimum material properties across the bearing shell and thrust surfaces. Tested within top-tier motorsports environments for strength, conformability, and anti-seizure properties.

## HI-PERFORMANCE V-SERIES BBC MAIN BEARING SET MS7000V

High-performance tri-metal bronze, lead-indium main bearings designed for GM BBC applications. Available in X, STD, .001 sizes. These bearings utilize three-piece assembled main flange bearings, engineered to provide optimum material properties across the bearing shell and thrust surfaces. Tested within top-tier motorsports environments for strength, conformability, and anti-seizure properties.

# DRIVE TAKES YOU FURTHER

**GOODYEAR**  
MORE DRIVEN.

Goodyear celebrates drivers and teams that move beyond what's possible to reach their highest potential.

**DAYCO**

na.daycoaftermarket.com | 800-848-7902

**DAYCO**

MOVE FORWARD. ALWAYS.™

**120**  
YEARS**DAYCO 8-MM BLOWER BELTS**

The Dayco 8-millimeter blower belt is built for Pro-Modified cars and Top Alcohol dragsters. Featuring Teflon-coated teeth and a carbon cord construction, it was engineered with real-world racing data for extreme durability and performance. Capable of withstanding 4,000 horsepower, it is available in multiple lengths, and 50-, 75-, and 84-millimeter widths.

**DAYCO SUPERCHARGER BELTS**

Engineered for late-model supercharged cars like ZR1 Corvettes, Shelby Mustangs, and Hellcats, the Dayco Supercharger belt features aramid-reinforced EPDM and high-stiffness PET cords that eliminate belt stretch and reduce slip under high-boost conditions. Developed with top Drag Pak racers, this belt line has seven part numbers that cover 150,000 VIO.

**DAYCO RACE SERIES HARMONIC BALANCERS**

PowerBond by Dayco Race Series harmonic balancers offer SFI-approved, high-horsepower performance in a durable, lightweight design. Tested beyond 21,000 rpm, they feature a CNC-machined forged steel hub bonded to a steel inertia ring. These Dayco balancers are available in overdrive and underdrive options and also come with laser-etched timing marks.

**DAYCO TIMING CHAIN KITS**

Dayco timing chain kits are ideal for engine rebuilds, they cost less than OE and are backed by a two-year/60,000 mile parts and labor warranty. These kits include high-quality chains that prevent stretch for the life of the kit, precision machined sprockets for exact timing, and high-grade OE plastic guides.

## DELTA PAG

deltapag.com | 212-203-2912

### BRUSHLESS FAN KITS

More airflow—up to 4,100 CFM. Thinner—only 2.70 inches. Soft-Start with variable speed for peak efficiency. Unique designed small brushless motor packs a punch. Kits are available in 12-, 14-, 16- and 18-inch sizes. Digital controls and accessories are included in the kit.

### BRUSHLESS WATER PUMP

Sixty gallons per minute (227 liters per minute). Variable speed acts like a virtual thermostat, can remove mech. thermostat. Brushless lasts over 50,000 hours. Single 1.75-inch inlet and dual 1-inch outlets for max flow. Will work with your ECU or Delta PAG's digital controller.

### MONO-CORE ALUMINUM RADIATOR

Newly designed aluminum cores use single extra-wide tubes vs. multiple smaller tubes. Unique Mono-Core design increases air velocity effectively increasing heat dissipation. The Mono-Core is also thinner than conventional radiators allowing for tight fit. Mono-Core cools better than four row.

### TRANS/ENGINE OIL COOLER

Alloy Flat Tube w/Turbulators has high heat dissipation rate. High flow rate with lowest pressure drop, supports high viscosity oils. Up to 250 PSI. -10AN ORB inlet/outlet. Two 1/8 NPT bungs for sensors or air bleeding. Two different sizes to choose from: 165,000BTU/h or 240,000 BTU/h.

## DERALE PERFORMANCE

usmotorworks.com | 323-266-3850

### BRUSHLESS DUAL POWERPACK – 12-INCH RAD FAN/ALUMINUM SHROUD WITH BUILT-IN PWM CONTROLLER 67942-185

Derales Brushless Powerpacks deliver cooling with dual 12-inch brushless fans, integrated PWM controller, and a slim 3.5-inch welded aluminum shroud. Producing 4,400 CFM, they maximize airflow for tight-core radiators while offering soft-start technology and extended component life, ensuring performance in the most compact package available.

### 18 ROW HI-FLOW RACING REMOTE FLUID COOLER WITH LOW-PROFILE FAN 65860

18 Row Hi-Flow Racing Cooler is precision TIG welded and features efficient tube design, which supports up to 350 PSI with minimal pressure drop. Mounted 8-inch electric fan is IP68 certified (Water/Dust Proof) and designed to do its best under the most strenuous conditions.

### FORD E40D, 4R100, 5R110 & 5R110W TRANSMISSION COOLING PAN 14208

Derales Transmission Cooling Pan uses air passing beneath the vehicle and redirects it to lower transmission oil temperatures. Designed for Ford's E40D, 4R100, and 5R110 and 5R110W heavy-duty transmissions, this pan features brazed, turbulator-equipped airway tubes passing through the lower section of the transmission pan for more efficient cooling.

### 16 PASS ELECTRA-COOL REMOTE COOLER 13700

With its own air supply available when needed, the Electra-Cool can be mounted anywhere, making it a popular addition for performance compacts, hot rods, muscle cars, and trucks. An efficient 16-pass tube and fin cooler coupled with a powerful 10-inch diameter Tornado fan.

# POWER UNDER PRESSURE

## CUMMINS PARTS THAT WORK HARDER

### 12V/24V **PPE** HEAD STUD KITS

Engineered for maximum strength and precision, the PPE Head Stud Kit is the ultimate choice for high-performance diesel builds. Each stud is center-less ground and thread-rolled to Mil-S-8879 specs for superior durability and reduced thread stress.

With a lab-tested tensile strength of over 231,900 psi, PPE Head Studs outperform similar industry brands – delivering unmatched reliability whether on the track or road for long-term use.

Each kit comes complete with everything you need for installation, including hardened parallel washers, nuts, and specially formulated assembly grease for uniform load distribution and accurate torque readings.

#### APPLICATIONS: 1989-2025

RAM 5.9L/6.7L Cummins

#### FEATURES

- This kit is built for high-performance and stock applications
- Tensile strength of over 231,900 psi
- Made from Chromoly Alloy Steel
- Black oxide finish, for protection from corrosion

**PRISHOW**

**GREEN HALL - BOOTH #7167**

### BAR AND PLATE TRANSMISSION COOLERS

#### APPLICATIONS: 2010-2025

RAM 2500/3500 68RFE/8HP75 6.4L HEMI/6.7L Cummins

#### FEATURES

- Up to a massive 360 cubic-inch core volume, a 118% increase over the stock cooler for better heat dissipation
- Up to 28% larger frontal area for increased airflow exposure and maximized heat transfer
- All-aluminum bar and plate construction for improved cooling capacity and pressure resistance
- Fully TIG-welded end tanks enhance strength and durability
- Delivers up to 30°F temperature drop, protecting against overheating and burnt clutches
- Includes new quick-connect fittings that work with stock cooler lines
- Retains all factory mounting points for a bolt-on installation

Installed on 2010 Dodge RAM 3500 6.7L

### \*HOT AND COLD SIDE INTERCOOLER CHARGE PIPE KITS

#### APPLICATIONS: 2010-2024

RAM 2500/3500 6.7L Cummins

#### FEATURES

- Direct Factory Replacement with no modifications or tuning necessary
- 3.5-inch mandrel-bent stainless-steel tubing
- Heat-resistant, weather-resistant silicone couplers
- Improved throttle response and up to 61% increased airflow
- Constant tension spring clamps

Available in Raw, Brushed, Black, and Polished

\*Currently not legal for sale in California. 50 states E.O. pending

# ELGIN INDUSTRIES

elginind.com | 800-323-6764

## ELGIN SLOPPY STAGE 2 CAMSHAFT: A MADE-IN-USA PERFORMANCE LEGEND

There are hundreds of reasons why the Elgin PRO-STOCK Sloppy Stage 2 camshaft (E-1840-P) is a popular choice among performance enthusiasts worldwide. From its classic, head-turning choppy idle, to superior power through mid-to-upper RPMs, to high-strength premium-grade material and precision machining, to Elgin's leading-edge heat treat technology, this legendary cam delivers an incomparable performance experience. Help your customers "GET SLOPPY" with the authentic, made-in-USA performance legend.

## ELGIN PRO-STOCK HYDRAULIC LIFTERS WITH NEXT-GEN DIAMOND-LIKE COATING

The Elgin PRO-STOCK performance line now includes ultra-durable flat-tappet lifters featuring a next-generation diamond-like carbon (DLC) coating. These street- and track-proven lifters are now available for a broad range of American muscle car engines. Elgin's DLC coating significantly enhances surface hardness and creates an extremely fast, ultra-low-friction interface with the cam lobe. As a result, performance engine builders can reduce valvetrain operating temps and energy loss, increase performance, and extend lifter and cam lobe lifespans. These PRO-STOCK lifters also virtually eliminate the need for traditional cam-to-lifter break-in.

## COMPLETE, MADE-IN-USA PERFORMANCE CAMSHAFT KITS

Elgin Industries has introduced five precision-matched, made-in-USA Performance Camshaft Kits engineered to help optimize an array of racing and street performance engines. Now available are Elgin PRO-STOCK Sloppy Stage 1, 2 and 3 camshaft kits featuring the same, genuine Elgin Sloppy Stage cams preferred by engine builders and performance enthusiasts worldwide. Each kit includes customer's preferred, USA-manufactured performance camshaft; superfinished beehive valve springs; hardened OE replacement push rods; hardened and black oxide coated valve spring retainers; machined valve locks; and valve stem seals.

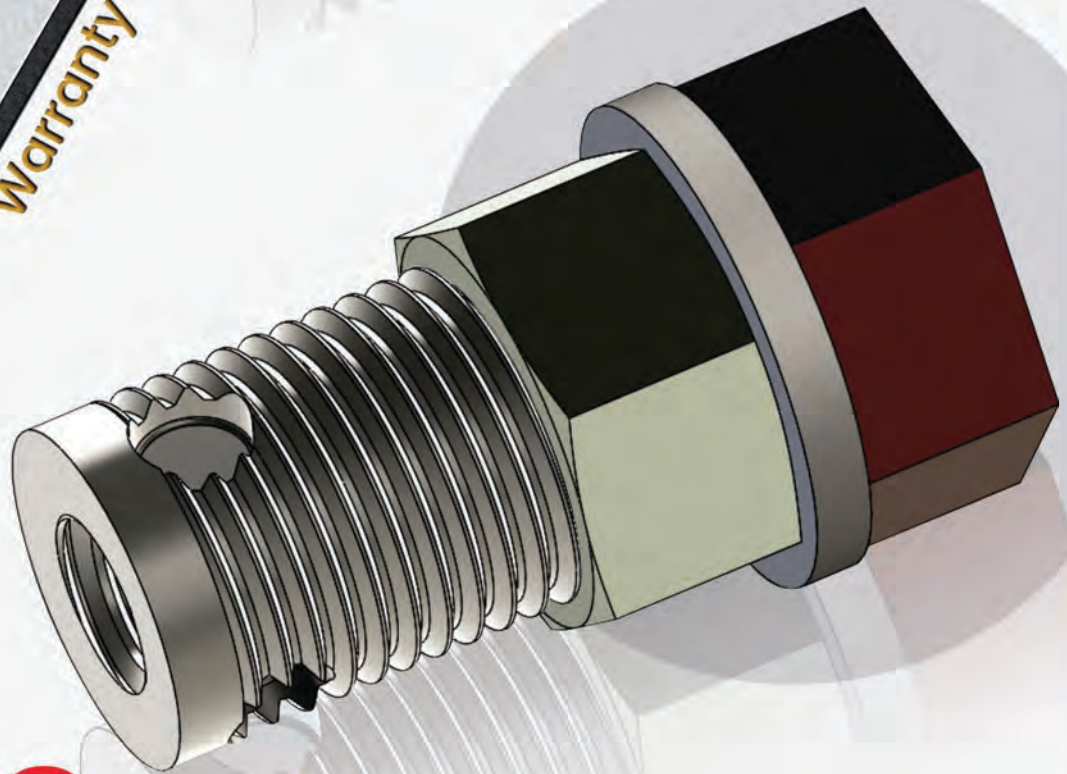

## STRIP- AND STREET-PROVEN PERFORMANCE VALVE SPRINGS

New Elgin PRO-STOCK high-performance valve spring sets are engineered specifically for GM LS and other popular performance engine platforms. These premium springs are also optimized for use with genuine PRO-STOCK performance cams, including the Elgin Sloppy Stage 2 cam (E-1840-P). Each PRO-STOCK high-performance valve spring features: micro-engineered surface finish for maximum durability; multilayer fatigue enhancement (eliminating potential surface defects and prolonging spring life); proprietary heat treatment (added strength and optimized residual stress); and beehive or conical spring geometry (reducing dynamic surges for exceptional valvetrain harmonics).

You in the **Racing Industry** have waited a long time for a better thread-repair insert. Your wait is over.

# FITECH FUEL INJECTION

fitechefi.com | 951-340-2624

## NEMESIS 4500 1600 HP BRIGHT ALUMINUM EFI SYSTEM

The Nemesis 4500 is a complete EFI system supporting up to 1,600-horsepower and flowing 1,820 CFM at 20.4 inH<sub>2</sub>O. It features eight injectors, dual IACs for smooth idle, three-bar TMAP compatibility, and a parabolic entry with 2.300-inch throttle blades for exceptional airflow and drivability.

## ULTIMATE SYNC DUAL QUAD EFI SYSTEMS WITH OFFENHAUSER CROSS RAM INTAKE SYSTEMS

The Ultimate Dual Quad EFI System features an Offenhauser 2x4 Cross Ram intake with self-learning sequential EFI and an external ECU with timing control. It's boost and nitrous ready, E85 compatible, and offers transmission control, dual O<sub>2</sub> sensors, eight injectors, three-bar TMAP, and Gold or Black finishes.

## GO SPARK ADVANCED CDI

This ignition system delivers a switchable 585/275 mJ of spark energy for maximum burn efficiency and cylinder pressure. It includes control for rev limit, start retard, and nitrous retard, along with a LED display showing rpm, voltage, and settings. Onboard diagnostics provide quick troubleshooting without needing a laptop.

## 12.3-INCH DIGITAL DASH DISPLAY

The 12.3-inch ultra-wide, anti-glare LCD delivers high-resolution graphics with full customization of skins, colors, gauges, and backgrounds. The Bluetooth app allows easy setup and calibration, while CAN connectivity reads FiTech ECU data and supports OEM sensor signals for speed, fuel, temperature, and warning indicators.

## FUEL INJECTOR CLINIC

[fuelinjectorclinic.com](http://fuelinjectorclinic.com) | 561-427-0082

### 3000CC INJECTOR

Meet the future of high-performance racing injectors. Looking for injectors larger than 200 lb/hr that can run all fuels? Tired of existing options that are poorly matched or leak from the box? Then say hello to the precision and performance of FIC's new 3000cc high-performance racing injector. At Fuel Injector Clinic, we take pride in delivering high-quality solutions that push engine performance to new levels. These 64-mm standard height injectors feature corrosion-resistant stainless internals, allowing for use with all fuels. The injectors feature a custom spray plate providing superior fuel atomization for optimal combustion and power. Compatible with aftermarket ECUs capable of using 8/2 Amp peak and hold drivers. Each set is precisely flow-matched using FIC's Data Match Technology, matching our injectors by both flow rate and individual offset value, going above and beyond the industry standards to optimize injector performance from idle all the way up to full throttle. We're excited to introduce our new 3000cc fuel injector, precisely engineered to deliver exceptional performance for even the most demanding applications.

toplineauto.com | 800-441-1400

## A-2104SE

High Performance Slow Leak Down Hydraulic Roller Drop-in Lifter for the 1980–2010 GM, Ford, International Power Stroke applications, which also includes the patented Direct Shot oiling system.

## A-0817

Drop in Hydraulic Flat Stock Lifter for the 1957–1995 GM applications.

## A-2281SE

High Performance with Slow Leak down Drop-in Hydraulic Roller Lifter for the GM LS applications, which includes a 22% extended bearing surface and the patented Direct Shot oiling system.

## A-2328S

High Performance Slow Leak Down Hydraulic Drop-in Lifter exclusively made from a Type 2 material giving a Rockwell hardness of 57 to 60 for the 1957–1995 GM applications.

## FORD BRONCO TUNED AUDIO KITS

Your Ford Bronco® is built for every adventure. Now your audio can keep up on the highway, the trail, or anywhere in between. Experience every note, beat, and bass drop with unmatched clarity and power.

f @ MBQuart.com  
#MUSICDEFINED

## UNLEASH ADVENTURE

Elevate every adventure with the ALL-NEW MB Quart® Bronco® Tuned Audio Packages. The MBQBRO-STG6-OEM-1 packs 800 watts of power through an 8-speaker system designed for seamless factory integration and crystal-clear sound. Add bold bass with the MBQBRO-302 OEM Subwoofer Kit or go all out with the MBQBRO-SUBR-1 Tailgate Subwoofer System - turning your Bronco® into a wall of sound for trails, tailgates, and beyond. Rugged, reliable, and built for adventure, MB Quart delivers premium audio wherever the road takes you.

Head over to [MBQuart.com](https://www.MBQuart.com) to learn more about the entire lineup of Bronco® Tuned Audio Kits.

### MBQBRO-SUBR-1 8-INCH SUBWOOFER UPGRADE

An upgrade in every aspect of build and sound quality over the Ford Bronco stock subwoofer, this 8-inch long-throw high-output subwoofer is powered by a 400-watt Class-D amplifier, delivering stronger bass response and improved clarity. Designed for seamless OEM installation, the MBQBRO-SUBR-1 OEM Subwoofer Upgrade completes any Ford Bronco Tuned Audio Kit.

### MBQBRO-302 TAILGATE SUBWOOFER

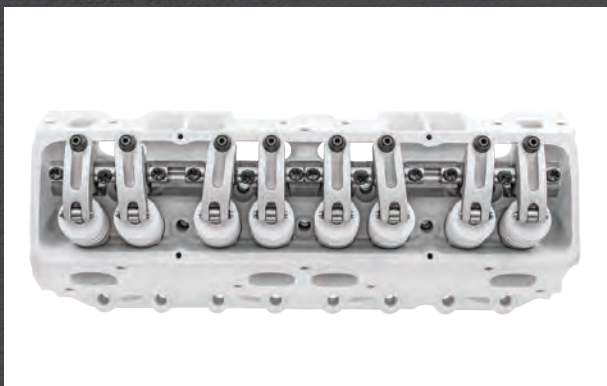

The MBQBRO-302 Bronco Tailgate Subwoofer System is engineered exclusively for Ford Bronco models from 2021 to the present. Designed with an application-specific 12-inch long-throw, high-output subwoofer, it delivers deep, commanding bass tailored to the Bronco's unique acoustics. Wired at 2 ohms and housed in a ported enclosure, the system harnesses 400 watts of high-efficiency power, driven by the included mono Class-D amplifier to ensure both reliability and performance!

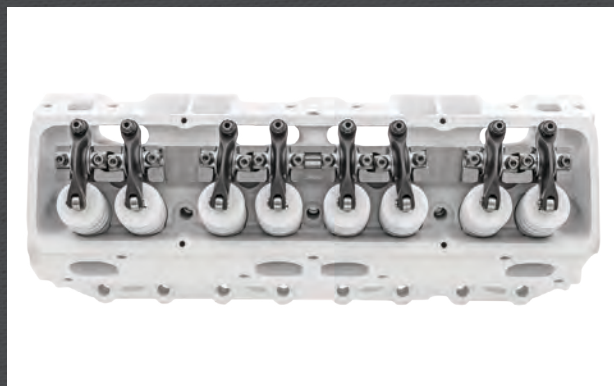

**JESEL**

jesel.com | 732-901-1800

**JESEL**  
VALVETRAIN INNOVATION**PRO ALUMINUM SHAFT ROCKERS**

Championship winning racers in nearly every form of racing rely on Jesel's Pro Series Shaft Rockers to get them into the winners circle—no wonder they are used by the top engine builders and race teams worldwide. Our rocker systems are custom built to your specifications and we have the most applications with the quickest build times in the industry.

**PRO STEEL SHAFT ROCKERS**

Designed for higher end applications with turbos, superchargers, and nitrous where excessive exhaust cylinder pressures surpass the limits of an aluminum shaft rocker. Jesel Pro Steel Shaft Rockers are ideal for all engines including drag, oval, road, diesel, and marine applications where the fatigue resistance of a steel rocker arm is highly beneficial.

**KEYWAY ROLLER LIFTERS**

Used by the top race teams in all championship winning engines for over 30 years. The Jesel Keyway Lifter can be found in nearly every class of racing. Durable enough for a 24-hour road race and tough enough for a 5000+ HP, 3 second Pro-Mod run. No matter what the application—Jesel has you covered.

**CAMSHAFT BELT DRIVE**

Dan Jesel invented the SB Chevrolet Camshaft Belt Drive back in 1982 with one goal in mind: To make the most accurate and durable timing system available. Nearly 45 years later and 70+ applications available, the Jesel Belt Drive has been copied, but never duplicated. Pictured: NEW LS Direct-Fit Belt Drive.

## FORD 7.3L GODZILLA CONNECTING RODS

Available in both PWR ADR and PWR ADR Plus versions for high boost and/or sprayed applications.

## PWR ADR PLUS CONNECTING RODS

These rods are made for high boost and sprayed applications where maximum rod strength is needed. Available in different lengths and configurations for LS, small block and big block Chevy, Ford, and Chrysler applications.

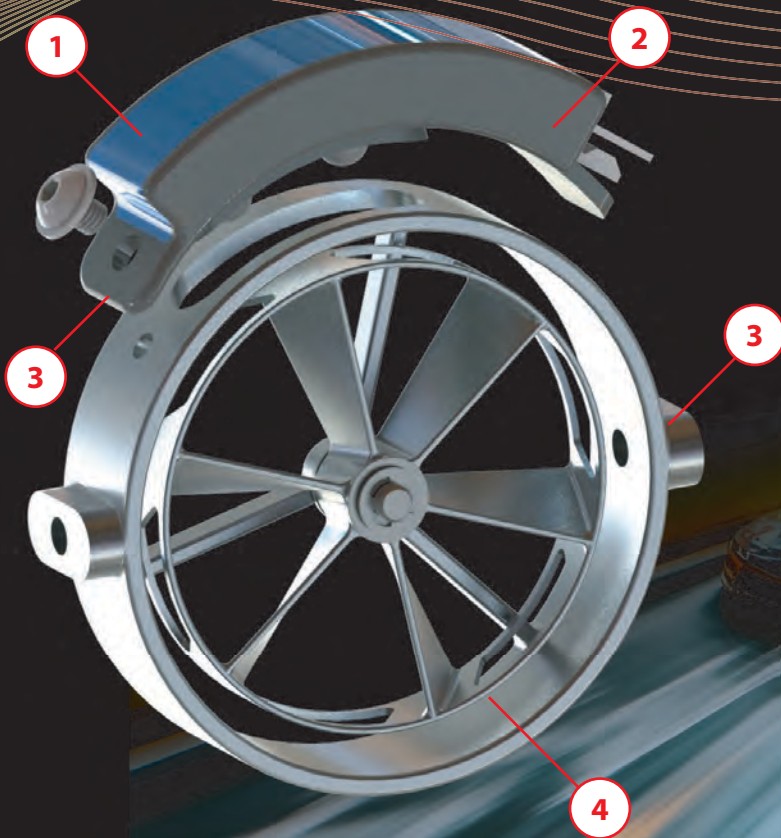

Emprise

# ANEMOMETERS

*Emprise GEN III Anemometers are ideally suited to a variety of flow measurement applications requiring compact and rugged instrumentation.*

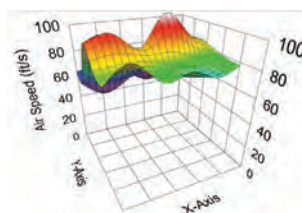

- ① New field-replaceable Modular Electronics Package (MEP). No re-calibration required.
- ② Surface Mount Technology (SMT) electronics for smaller MEP size, resulting in reduced aero-blockage.
- ③ Metric hardware means replacement parts are globally available.
- ④ Revised Sensor Window design in turbine rim for improved aerodynamics.

In today's world of competitive motorsports, teams are searching for even the tiniest advantages over the competition. Engineers are finding one advantage by reducing aerodynamic drag through optimization of air flow. This involves making the most efficient use of the air that is taken onboard the vehicle for cooling the engine and drivetrain.

Emprise anemometers quantify the air taken onboard and detect very minute changes in flow and how it's distributed across the heat exchanger.

Emprise anemometers can be used to measure air flow to radiators, intercoolers, oil coolers, brake ducts, differentials, and passenger cabins.

Emprise anemometers are robust and durable enough for wind tunnel, track, or field testing.

Signal Conditioning Units and Custom Data Acquisitions Systems are available.

# OPTITORQUE TECHNOLOGIES

optitorque.com | 315-924-3888

## PATRIOT SERIES FASTENERS

Provides a performance upgrade over OEM torque-to-yield fasteners. Available for popular domestic, import, and diesel stud and bolt applications for heads and mains, as well as exterior and accessory fasteners. OptiTorque fasteners are manufactured in the USA from domestic materials.

## H11 TOOL STEEL FASTENERS

Providing solutions and strengths from 240 – 275 ksi. Available for: custom fasteners, popular domestic, import, diesel, engine, and powertrain applications. OptiTorque fasteners are manufactured in the USA from domestic materials.

## TORQUEMASTER SERIES FASTENERS

OptiTorque TorqueMaster is the go-to alloy for serious performance applications, offering the improved stretch area in its price class while increasing fatigue and clamping properties. Available for popular domestic, import, and diesel stud and bolt applications for heads and mains. Manufactured in the USA from domestic materials.

## CUSTOM AGE FASTENERS

OptiTorque Custom Age fasteners are for ultra-high-performance applications without compromise and feature the company's proprietary processes and a corrosion-resistant tumbled finish. Available for popular domestic, import, and diesel stud applications, including aftermarket blocks. OptiTorque fasteners are manufactured in the USA from domestic materials.

# MORE THAN JUST CRANKSHAFTS

## Finish Ground Camshafts

- All cores manufactured and heat treated in house.
- Barrell diameter matched to base circle for maximum stiffness.
- All lobe profiles ground in Landis CNC grinders.
- Feature geometry verified in our Jenoptik laser scanner.
- Lobe geometry verified in our Adcole gage.

## Ultra Connecting Rods

- Optimized cross sections for excellent strength to weight ratio.
- Fastener threads are fully engaged – no exposed threads.
- Mating faces have edge breaks machined in to reduce prep work.
- Bearing tab slots shifted for better bearing edge clearance with large crankshaft fillet.
- Unique big end geometry maintains bearing housing roundness at high RPM.

# OTR FILTERS

otrfilters.com | 800-263-8660 x 224

## OTR PREMIUM OIL FILTERS

OTR premium oil filters deliver high flow for maximum performance and protection. Featuring an anti-drain back valve and bypass valve, they ensure consistent oil pressure and engine safety. Available for Ford, Chevy, and Mopar applications, these filters provide reliable, high-quality filtration for long-lasting engine performance.

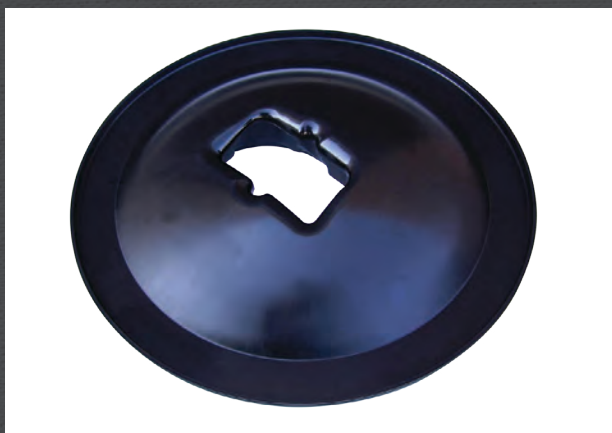

## OTR REPLICA OEM FILTERS

Mopar's Collector's Guide has described the above Mopar Six Pack replica filter as "the most painstakingly accurate reproduction of the original known to mankind. They have produced what is hands-down the new gold standard for oval filters." If you want to impress the judges this filter will deliver. Come see the other models offered.

## OTR BLACK HEX SERIES – MOPAR RELACEMENTS

High-performance replacement air filters like the Challenger/Charger replacement seen left, deliver four times higher flow for easier engine breathing and increased horsepower. Available in multiple color options, they combine style with performance for a powerful upgrade.

## OTR AIR CLEANERS

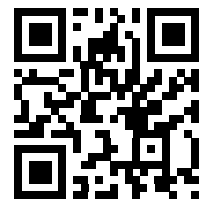

The Holley 4412 2-Barrel Air Cleaner Base ensures a precise fit on the choke tower, delivering double-digit horsepower gains. Engineered for both race and street performance, this air cleaner maximizes airflow and efficiency, giving your engine the power and reliability it needs. Ask about our line of air cleaner lids, bases, and kits.

Trusted for performance.

CLEVITE engine bearings & MAHLE piston rings!

## Want the very best out of your performance vehicle?

Built for serious horsepower, CLEVITE® performance engine bearings deliver the strength and reliability racers trust. With advanced coatings and race-proven durability, they help engines run smoother and last longer—even under extreme conditions. Whether you're building for the track or upgrading your street machine, CLEVITE gives you confidence under the hood.

MAHLE® performance piston rings are engineered for high-performance builds, offering excellent sealing, reduced friction, and long-lasting wear resistance. Whether on the track or strip, they help unlock your engine's full potential. Precision-crafted and trusted by professionals, MAHLE piston rings are made to perform when it matters most.

# PACIFIC PERFORMANCE ENGINEERING

ppepower.com | 725-238-2002

## 2020-2026 FORD F-250/F-350/F-450/F-550 6.7L POWER STROKE EXHAUST MANIFOLD

High Sil-Moly cast iron construction with improved hardness and corrosion resistance. Seventy-five percent increased wall thickness eliminates cracking/warping that's commonly seen on the factory manifolds. Twenty-eight percent increased flange thickness for superior durability and strength. Compatible with factory EGR pipe, up-pipes, and manifold heat shields. Includes manifold gaskets, EGR pipe gaskets, and hardware.

## 2011-2026 FORD 6.7L AIR-TO-WATER INTERCOOLER KIT

High-flow internal core, all-aluminum, bar-and-plate-style construction. Sixty-three percent less restrictive than stock intercooler. Fifty percent larger core increases cooling efficiency, which greatly increases charge air density, with an easy, drop-in fit installation. Lower exhaust gas temperatures. Increased fuel efficiency; reduced inlet backpressure allows the turbocharger to operate more efficiently. Large, flow-optimized end tanks. Consistent power output during demanding conditions. Patent pending.

## 2020-2026 FORD 6.7L POWER STROKE ZILLA INTAKE MANIFOLD AND TURBO INLET KIT

Large 3.25-inch stainless steel tubing and hydroformed runners for increased airflow. Eliminates stock restrictive EGR inlet swirl with 69% higher maximum flow rate than the stock manifold. Fully round 4-inch stainless-steel turbo inlet removes the factory two-chamber plastic intake resonator. Redesigned stainless steel EGR pipe and gaskets. Fully round airbox duct made of 100% dry carbon fiber for unrestricted airflow and reduced weight. Lower manifold gaskets and EGR pipe gaskets included, five-ply silicone couplers with oil resistant inner layer. OEM-like fitment, retains all stock mounting points compatible with regular-output and 500 hp high-output trucks.

## 2020-2026 FORD 6.7L POWER STROKE HIGH-FLOW UP-PIPES

Fifty percent larger flow area, better exhaust gas flow, reduces exhaust back pressure by 65% and improves turbo efficiency and engine torque. Full 304 stainless steel construction, bolt on fitment, compatible with OEM sensors, new gaskets included.

# EXCELLENCE FROM START TO FINISH...

**BRODIX IS THE ONLY CYLINDER HEAD COMPANY THAT CONTROLS THE MANUFACTURING PROCESS FROM BEGINNING TO END.**

BRODIX products are made in the USA at our own foundry with the use of spectrochemical analysis where we have had five generations of precision metal casting experience.

BRODIX uses 5-axis CNC porting with the coordinate measurement system to 100% CNC machine all heads with total accuracy.

We are the only manufacturer with total repair capabilities. We successfully repair 98% of the damaged BRODIX heads that are returned to us.

From lifetime customer service and technical support to continuous development and testing, BRODIX is dedicated to serving our customers well into the future.

As racers and car enthusiasts ourselves, we know racing parts are a big investment. That is why we work hard every day to ensure that BRODIX produces the best of the best!

## 2019-2025 GM 8L45/8L80/8L90 HEAVY-DUTY CAST ALUMINUM TRANSMISSION PAN

Premium A356.0-T6 heat-treated cast aluminum alloy, which is a high-strength, thermally conductive material. Precision-cast using permanent steel molds for a smooth, consistent finish and high dimensional accuracy, increased fluid capacity by 3.9 quarts for higher thermal capacity. Tall 3/4-inch external fins improve heat dissipation, lower transmission fluid temperature, and increase impact resistance. Deep 7/8-inch internal baffles enhance heat absorption and minimize fluid sloshing. External fins and internal baffles work together to form an ultra-strong cross-bracing structure. Cast-in gussets for additional transmission housing flange support and increased rigidity. 304 stainless steel service plugs with built-in high temperature rated neodymium magnet and Viton O-ring. Included standpipe ensures accurate fluid level checks during the filling process. Equipped with a 1/8-inch NPT port with pre-installed NPT plug. Integrated filter support ensures proper filter placement. Compatible with OEM gasket and filter. Patent pending.

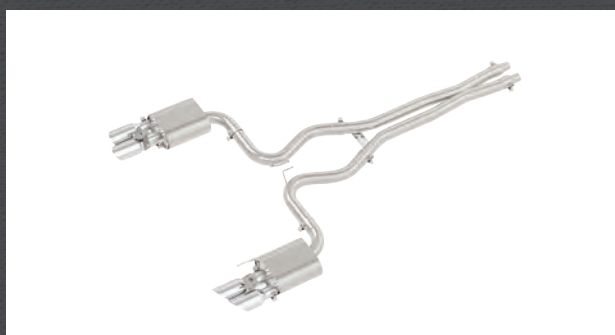

## 2015-2019 GM 2500/3500 6.0L 6L90 BAR AND PLATE TRANSMISSION COOLER

Massive 211 cubic-inch core volume, a 189% increase over the stock cooler for better heat dissipation with 68% larger frontal area for increased airflow exposure and maximized heat transfer. All-aluminum bar and plate construction for improved cooling capacity and pressure resistance. Fully TIG-welded end tanks enhance strength and durability, that delivers up to 45°F temperature drop, protecting against overheating and burnt clutches. Includes new quick-connect fittings that work with stock cooler lines. Retains all factory mounting points for a bolt-on installation.

## 2015-2023 SILVERADO/SIERRA 1500 WITH 8L90 TRANSMISSION

Silverado/Sierra 1500 8L90 Transmission and 1/2-inch line. Maximizes fluid flow to and from the transmission cooler made from billet aluminum construction. Direct fit with OEM 8L90 eight-speed transmission and fluid lines. Service plug with Neodymium magnet and O-ring seal.

## 2018-2023 FORD MUSTANG GT CAT-BACK ACTIVE EXHAUST

Full 3-inch 304 stainless steel construction. Mandrel-bent tubing and X-pipe reduces back pressure and improves flow with 4-inch quad polished tips. Quiet to aggressive deep rumble with drive mode retention. No cutting or welding required—direct bolt-on.

# Dedicated To Quality Power & Durability

## MERLIN IV

The new MERLIN IV has been completely redesigned for industry leading performance and ease of use. World has made improvements to virtually every area of the new Merlin IV with the goal of producing the most technologically advanced iron BBC block available!

- 9.500/9.800/9.850/10.200/10.250 Deck Heights
- Available w/ 55mm Cam & .904 Lifters
- Thick .310 Cylinder Walls @ 4.600 Bore
- Strengthened Main Webs & Cam Tunnel
- Dual Register Main Caps w/ARP Fasteners
- Improved Priority Main Oiling System
- Special High Strength Cast Iron

## MOTOWN III

World's updated MOTOWN III small block is strong and incredibly versatile, with .700" thick decks, ability to use standard SBC cams or late-model step nose style cams. Made in the USA with high strength iron alloy and industry leading features.

- Extra Thick Deck Can Be Cut To 8.800"
- Machined For Std SBC or Step-Nose Cams
- Clearanced For 4.000" Stroke
- Dual Register Main Caps w/ARP Fasteners
- Improved Priority Main Oiling System
- Special High Strength Cast Iron

## MAN O'WAR

With the redesigned Man O'War, World Products has created the strongest, most advanced iron block for 302 & 351 style Fords available today! Utilizing special iron alloy and increased main web thicknesss dramatically increases strength.

- 6 Head Bolts Per Cylinder
- 40,000PSI Iron Alloy & Extra Thick Main Webs
- Cylinders Extended 1/2" Into Crankcase
- Low Restriction Priority Main Oiling System
- Clearance for 4.250" Stroke @ 9.500" Deck
- Clearance for 3.500" Stroke @ 8.200" Deck

## 2017-2025 GM 6.6L DURAMAX HIGH-FLOW EXHAUST MANIFOLD AND UP-PIPE KIT

Significant reduction in exhaust back-pressure. Lower EGTs, better turbo efficiency and fuel economy. Sil-moly cast iron construction. Two-inch Free-Flow up-pipes with sleeved bellows. Up-pipes compatible with factory heat shields and exhaust manifold gaskets with high-temp coating are included, as well as the upper and lower up-pipe gaskets are included. Manifold bolts, studs, and spacers included.

## 2020-2025 GM 6.6L DURAMAX ZILLA CARBON FIBER TURBO INLET TUBE

One-hundred percent genuine, dry/prepreg carbon fiber construction. Easy, bolt-on installation with no tuning required. Kit includes stainless steel clamps and PPE 5-ply silicone couplers. Eliminates stock restrictive resonator and improves airflow, and is available in two carbon fiber appearances: twill weave or forged.

## 2020-2025 GM 6.6L DURAMAX HEAVY-DUTY CAST ALUMINUM ENGINE OIL PAN

Premium A356.0-T6 heat-treated cast aluminum alloy. Precision-cast using permanent steel molds for a smooth, consistent finish and high dimensional accuracy. Increases oil capacity by 2 quarts for higher thermal capacity with cast-in gussets for additional upper oil pan flange support and increased rigidity. Stainless-steel drain plug with built-in high temperature rated neodymium magnet. Thick ribs across the midsection of the pan for better structural integrity with longitudinal cooling channels along the bottom of the pan, increasing external surface area and enhancing heat dissipation. Precision machined sealant grooves guide the application of RTV-style sealant for a consistent bead and a reliable seal. Equipped with a 1/8-inch NPT port with pre-installed NPT plug.

## 2020-2025 GM 6.6L DURAMAX 10L1000 HEAVY-DUTY CAST ALUMINUM TRANSMISSION PAN

Premium A356.0-T6 heat-treated cast aluminum alloy, which is a high-strength, thermally conductive material. Precision-cast using permanent steel molds for a smooth, consistent finish and high dimensional accuracy. Increases fluid capacity by 4 quarts for higher thermal capacity with tall 3/4-inch external fins improve heat dissipation, lower transmission fluid temperature, and increase impact resistance. Deep 1.2-inch internal baffles enhance heat absorption and minimize fluid sloshing. External fins and internal baffles work together to form an ultra-strong cross-bracing structure with cast-in gussets for additional upper oil pan (transmission housing) flange support and increased rigidity. 304 stainless steel service plugs with built-in high temperature rated neodymium magnet and Viton O-ring. Integrated standpipe ensures accurate fluid level checks during the filling process. Equipped with a 1/8-inch NPT port with pre-installed NPT plug. Compatible with OEM gasket and filter.

# FUELING PASSION

## Steering Wheel Quick Release

For over 60 years, Motor State Distributing has fueled the passion of racers. At its core, racing and the parts that support the racing industry have been at the heart of what we do. Since 1964, our founder, George Lane, understood that this was more than just a business; it's about passion.

pbm-erson.com | 800-588-9608

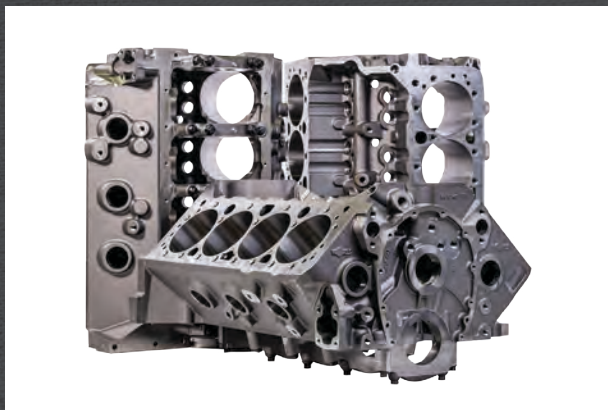

## ERSON CAMS STAINLESS VALVES

Erson stainless steel valves are manufactured from premium forged alloys to exacting tolerances. Incorporating features like a precision machined face for consistent volume, precision ground keeper grooves to eliminate stress risers, and an undercut stem Powerflow design, Erson valves were engineered for dependable, long-lasting performance.

## ERSON CAMS CUSTOM CAMSHAFTS

Erson Cams specializes in custom ground camshafts for discerning racers and engine builders. With hundreds of lobe designs, Erson can produce a custom camshaft ideally suited to your particular application. Erson employs index-grinding to ensure that the critical case hardening in the lobes is maintained at maximum uniformity.

## WORLD PRODUCTS IRON BLOCKS

World's blocks and heads are packed with performance enhancing features that make them superior to OEM castings. Widely used in all forms of motorsports, from drag racing, circle track dirt and asphalt to off-road and marine racing, World blocks and heads were designed to deliver race-winning performance and durability.

## PBM ROTATING ASSEMBLIES

PBM offers a wide range of rotating assemblies from its "Ultimate Billet Series, 4340 Ultralite, 4340 Superlites and Standard Weight Forged Crankshafts." All of its assemblies feature quality premium components from leading manufacturers.

# PETERSON FLUID SYSTEMS

petersonfluidsys.com | 800-926-7967

## R4 V-BAND PUMP MOUNT KIT

Use this ProCharger specific V-band mount kit to install a R4 oil pump on the accessory drive. Mount kit will work with both 3/8 Hex and 5/8 Round style ProCharger CrankDrive accessories. R4 oil pumps with front pressure sections will mount directly to this system with the provided hardware. PN #14-2202.

## PROCHARGER READY R4 OIL PUMP FAMILY

Using the available V-Band mounting kit #14-2202, easily mount these ProCharger ready R4 oil pumps on the accessory drive. All Peterson oil pumps and mounting systems are manufactured in the USA and in-house from 6061 T-6 billet aluminum for reduced weight and superior strength. PN #04-1096, 04-1096-HEX, 04-2096, 04-2096-HEX, 04-1496-HEX, 04-2496-HEX, 04-5096, and 04-5096-HEX.

## BLACK CERAMIC FINISH OIL TANKS

Sinister look, same great Peterson features. New, black ceramic coating provides a tough and stylish appearance while keeping weight to an absolute minimum. The race-proven tank geometry, plumbing, and baffle design provide excellent deaeration of the scavenged oil while maintaining a tall column of oil over the pickup tube. PN #08-0009-BLK, 08-0783-BLK, 08-0783-CC-BLK, 08-0785-BLK, 08-0785-CC-BLK, 08-0786-BLK, and 08-0786-CC-BLK.

## 5-GALLON FAT BOY DLM OIL TANK

When chassis space is limited. FatBoy features a lower profile design and all the standard features of Peterson Fluid System's race proven DLM tanks, you'll get a tank that is 18.62-inch tall and has a 5-gallon capacity. 10.5-inch tank straps with mounting brackets are available for convenience. PN #08-9019.

# PROFORM PARTS (SPECIALTY AUTO PARTS U.S.A., INC.)

proformparts.com | 586-774-2500

## ULTRA-PERFORMANCE 12-INCH BRUSHLESS MOTOR PULLER FANS – DUAL PACK

Dual 12-inch brushless fans (Part No. 67038) deliver 4200 CFM combined, longer lifespan than brushed fans, and fit tight engine bays. Installs easily with universal 12-volt wiring, soft start technology, and robust cooling power for race or street. Works seamlessly with PROFORM brushless fan controllers for precise speed control.

## ULTRA-PERFORMANCE 10-INCH BRUSHLESS MOTOR PULLER FAN

Single 10-inch brushless fan (Part No. 67034) outputs over 1,000 CFM of engine cooling. Compact design, long-lasting motor, and soft start protection provide reliable performance in high-demand automotive environments, perfect for dual-fan radiators, tight spaces, or auxiliary cooling. Works seamlessly with PROFORM brushless fan controllers for precise speed control.

## ULTRA-PERFORMANCE 16-INCH BRUSHLESS ELECTRIC RADIATOR FAN – S-BLADE STYLE

Delivering 3,300 CFM, this 16-inch brushless fan (Part No. 67037) offers improved cooling with a 3-inch low-profile design. Lightweight and featuring a soft-start motor to prevent amperage spikes and is ideal for tight engine bays. Universal 12-volt installation or seamlessly integrate with PROFORM brushless fan controllers for precise control.

## BRUSHLESS DIGITAL FAN CONTROLLER (PART NO. 69597)

The PROFORM Brushless Fan digital variable-speed controller (Part No. 69597) automatically adjusts PROFORM brushless fans based on temperature or manual override. Weather-resistant housing and an intuitive four-button display deliver precise, reliable cooling control for high-performance engines. Compatible with single or dual fan setups for ultimate flexibility and efficiency.

# XCEL DYNE

xceldyne.com | 800-448-1223

## TITANIUM VALVES

Xceldyne supplies the finest titanium valves to the world's top motorsports engine builders. Moly or PVD stem coating available along with multiple head coating options. Superior materials and refined manufacturing processes. Hollow stem with sodium filled options. Short lead times on custom valves. Semi-finished blanks available for shorter lead times.

## STEEL VALVES

Xceldyne supplies the finest steel valves to the world's top motorsports engine builders. We are forging high-performance nickel-based alloys for increased operating temperatures. Hollow stem available for weight reduction. Sodium filled options for cooling. Short lead times on custom valves.

## ROCKERS, FINGERS, LIFTERS

Rockers and Fingers: Superior high speed tool steel material. Optional DLC coating for friction reduction and wear protection. Optimum pad design for aggressive valve motion. Lifters: 937 body. Integrated key for unrivaled lifter body geometry. Center or offset push rod locations. DLC coated and/or nitrided. Stock and custom available.

## VALVE ACTUATION: CAM DRIVE

Xceldyne redefined the belt drive system. Patented thrust bearing system is easy to install due to "captured" low drag thrust assembly. Timing belt technology also patented. Surface treated pulleys for maximum durability and belt life. O-ring for enhanced block/plate seal. High-quality crank and cam seals for long life.

# THE 6.7L POWER STROKE REINVENTED —

## ELEVATING THE 6.7L POWER STROKE TO ITS FULL POTENTIAL

### Performance You Can Depend On

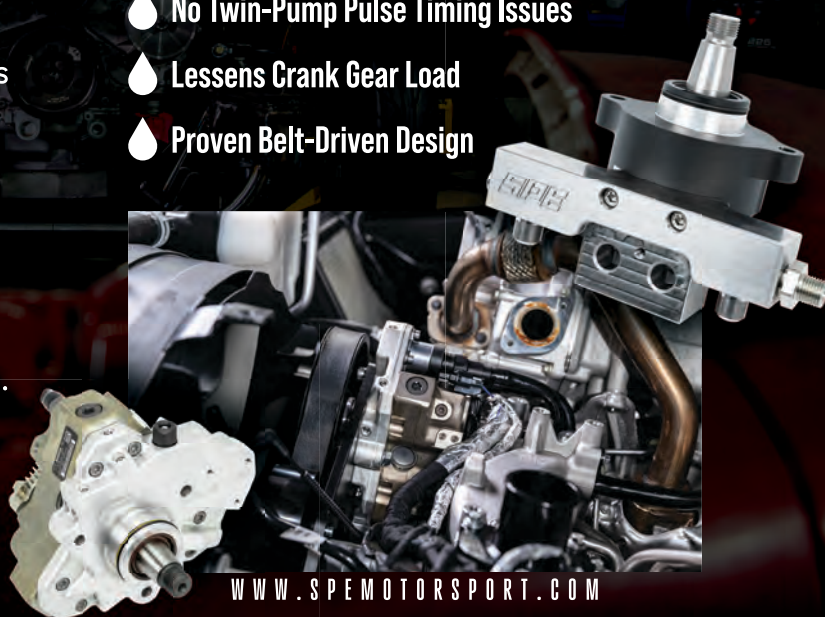

The Ford 6.7L Power Stroke is known for its capability, but even the most robust platforms benefit from some refinement. SPE Motorsport pushes beyond factory limits designing precision-engineered components that eliminate weak points, enhance reliability, and deliver consistent power mile after mile. It's not just about more performance—it's about confidence under any load, in any condition.

With SPE Motorsport, you're getting upgrades that are designed to do more than make power.... they're engineered to sustain it. From billet aluminum materials to improved flow and cooling systems, every part is tested and proven to handle the demands of heavy-duty daily use, towing, and even racing. This is reliability built through craftsmanship, not compromise. For work or play, we've got you covered.

# FUELING REDEFINED

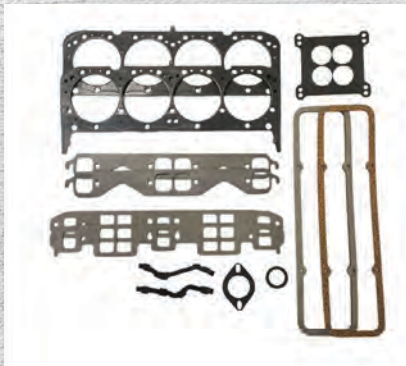

## NEW 6.7 CP3 CONVERSION KIT!

- 100% Factory Replacement System
- Retains All Factory Fuel Lines & Vacuum Pump
- No Twin-Pump Pulse Timing Issues
- Lessens Crank Gear Load
- Proven Belt-Driven Design

### BILL MITCHELL PRODUCTS ALUMINUM ENGINE BLOCKS

Bill Mitchell's aluminum blocks are cast and CNC machined from 357-T6. They feature centrifugally cast ductile iron replaceable cylinder sleeves. Main caps are CNC machined from 1045 billet steel, located by ring dowels and ARP studs. All blocks are designed with priority main oiling. Available blocks: SB Chevy, LS Chevy, BB Chevy, 409 Chevy, SB Ford, and BB Chrysler (Hemi/Wedge RB).

### BOOST PRODUCTS USA PIE CUTS WITH SPIGOTS

The new generation of stainless-steel Pie Cuts sets a new standard. Developed with fabricators in mind, each segment features small alignment tabs that ensure perfect fitment and positioning with no need for tape, clamps, or grinding. These Pie Cuts simplify the welding process while offering maximum accuracy and repeatability. Key benefits include interlocking tabs to prevent slippage and misalignment. No grinding required, ready to weld out of the box. The Pie Cuts are available individually or as six-piece kits for 90-degree bends. They're available in a wide range of diameters, bend radii, and angles. Manufactured from premium stainless steel for durability and performance. This design innovation not only speeds up fabrication but also improves the quality of each weld joint.

### S.B. INTERNATIONAL (SBI) CUMMINS 5.9L HD FLEXPATE

This Cummins 5.9L HD Flexplate meets SFI 29.1 certification standards. It is internally balanced, making it a trusted choice for performance builds, racing, and heavy-duty towing. Built with a 15.350-inch diameter and 152 teeth, this flexplate is engineered for high-torque diesel applications, delivering long-lasting strength and resistance to cracking or warping. Designed specifically for Cummins/Dodge 5.9L Turbodiesel engines (2007-up) with 47RE/48RE transmissions, ensuring a precise fit.

[specialtyheadersinc.com](http://specialtyheadersinc.com)

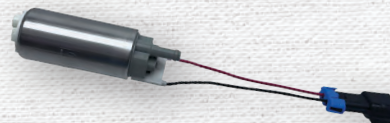

### T&D MACHINE PRODUCTS T&D ROCKER SYSTEM

These rockers (part no. 8303) are anchored on a one-piece stand design for a stiffer, more rigid mount, making for a far more consistent valve lash. T&D engineers have improved the geometry over the original OEM compromises, while maintaining the original configuration to make it truly bolt-on. The set fits under a stock valve cover. The rocker ratio is OEM. The T&D rocker system oils through the head like stock, but like most T&D systems, it also has internal oiling through the rocker bodies for improved oiling to the trunnion, roller tip bearings, and pushrod ends. T&D added spring spacers for ease of spring maintenance or testing. The system uses ball/cup-style pushrods. T&D has developed rocker shafts with a much heavier 5/16-inch (0.325) wall thickness.

### UNITED ENGINE & MACHINE UEM ENGINE OVERHAUL KITS

New UEM Engine Overhaul Kits include Dualoy pistons, pins, locks, rings, and a premium Elring overhaul gasket set. The components supplied in these kits allow engine builders to meet or exceed OE performance. OE-quality gaskets have been difficult to find for many of the late-model truck engines, so UEM added a complete offering of Elring gaskets to complement UEM's Dualoy piston and ring coverage for these popular diesel truck engines: Ford Power Stroke, Dodge/Ram, GM Duramax, and Mercedes Sprinter.

### VMP PERFORMANCE VMP MUSTANG S550 ENGINE COOLANT DEGAS BOTTLE KIT

Tired of the bulky, discolored factory coolant reservoir cluttering up your engine bay? Upgrade to VMP Performance's aftermarket degas bottle designed specifically for all 2015–2023 Mustangs, including EcoBoost, V-6, GT, Mach 1, Bullitt, and GT500. This compact replacement not only cleans up the look under the hood, but it also makes trackside maintenance easier. The reduced size and clean design provide more space to work. Direct fit: Works with all factory hoses and connections. Factory cap compatible: Reuse the stock or decorative coolant cap. Quick connect included: Comes with the fittings, bolts, and clamps needed for an easy install. Durable finish: Textured black surface maintains a consistent, OEM-quality appearance.

# CHASSIS, DRIVELINE & SUSPENSION COMPONENTS

These suppliers specialize in transferring power efficiently and effectively. Stabilize chassis with traction bars, strengthen driveshafts or change out differential gear ratios with a quick-change rearend. When completing the race car matters most, these components will come in clutch.

## ATI PERFORMANCE PRODUCTS

atiracing.com | 877-298-4817

### ATI HONDA K-SERIES TRANSMISSION ADAPTER KIT - PART #916654

ATI's new kit allows you to bolt up a RWD GM transmission such as the Powerglide, T350, T400, 4L60, 4L80E and more, behind a K-Series engine, with bolt patterns for both straight up engine orientation or OEM 15 degree slant. Kit includes adapter plate, crank adapters, SFI flexplate and installation hardware. Modified bellhousing and starter available.

### ATI SUPER F ATF NOW AVAILABLE IN 0, 10, 20, 30 & 50 WEIGHT

ATI has introduced more options to its Super F 100% Synthetic ATF line. All new Ultra Duty 50 Weight, Low Viscosity 10 Weight, and Ultra Low Viscosity 0 Weight with new 60 weight coming soon—blended with the best base synthetics and friction modifiers for true "Type F" performance.

### ATI SUPER DAMPER FOR MCLAREN M838T(E) & M840T(E) ENGINES - PART #917181

ATI's new Super Damper is a direct replacement for OEM McLaren Damper. The flat plane crank works well at higher rpm but feels very rough at idle. The viscous filled OEM damper can't perform as well at higher rpm levels like the ATI Super Damper and this is where the McLaren engine shines.

### ATI FLEXPLATE KIT FOR 2020+ TOYOTA SUPRA / BMW B58 ENGINE - PART #915741

ATI's all new Toyota Supra B58 flexplate kit includes ATI's SFI 122-tooth flexplate (915472) and crank adapter (915082) and works with an OEM converter and flexplate bolts. ATI flexplates are double MIG/TIG welded for additional strength and lasting precision pass after pass and exceed the flatness and run-out tolerances of the OEM units.

## ATL RACING FUEL CELLS

atlinc.com | 201-825-1400

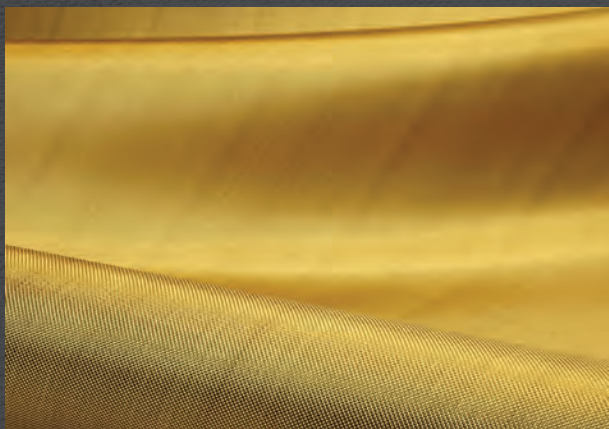

### VORTEX PRO EQUIPPED ATL SAVER CELL

Say goodbye to fuel starvation—the ultimate plug-and-play fuel cell is here. ATL's rugged, FIA FT3-approved Saver Cell pairs up with the innovative ATL Vortex Pro top plate system, creating a powerhouse unit built to perform in the most demanding forms of motorsports.

### REDESIGNED FUEL CELL CONTAINER

It's not just a can. Meet ATL's newly redesigned fuel cell container, available in both aluminum and steel. The vertical edge design allows for installation into tight confines, while the built-in strap provisions promote secure mounting. A convenient removable window allows tech inspectors to easily check the validity date of the fuel bladder.

### ATL 922-C WITH KEVLAR EXO

ATL's 922-C fuel bladder material made with Kevlar EXO is not only an astounding 20% stronger for 15% less weight (finished product) as compared to the previous FIA FT5-1999 approved version, but this flexible bladder technology also performs with today's latest sustainable fuels, helping to pave the way for a greener future in the world of motorsports.

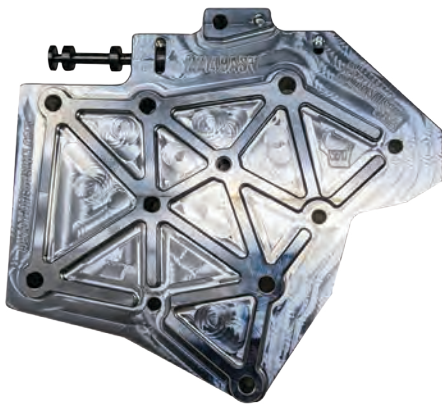

### ATL PORSCHE 911 DUAL DRY-BREAK KIT

Now for the Porsche 911. This bolt-in conversion kit allows Porsche 911 Cup models to compete in endurance racing events while utilizing their existing ATL fuel cell. The female 2-inch dual dry-break kit bolts directly to the top plate of the fuel cell and accepts quick refueling via vent bottle or overhead rig.

## AUTOMATIC TRANSMISSION DESIGN

autotransdesign.com | 262-251-7777

### TURBO 400 VALVEBODIES

Automatic Transmission Design offers a complete lineup of valvebodies for every TH400—13 distinct styles and counting. Manual valvebodies are available with or without transbrake function. Multiple shift patterns, three speed/two speed, clean/safe neutral options, engine braking options. Available in US domestic billet aluminum and OE cast iron.

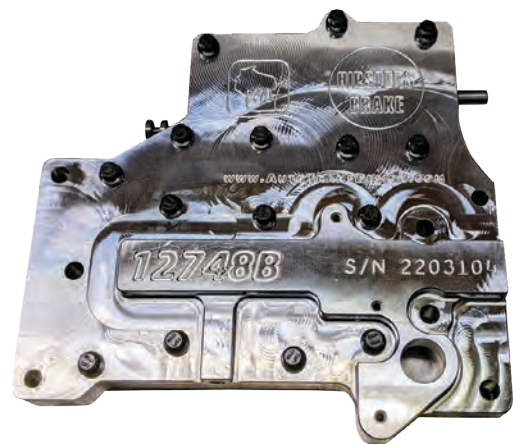

### TURBO 350 VALVEBODIES

A brand new lineup of valvebodies is offered for every TH350 in six distinct styles and counting. Manual valvebodies are available with or without transbrake function. Reverse shift pattern, three speed, engine braking options available. Offered in US domestic billet aluminum and OE cast iron.

### 4L80E VALVEBODIES

Transform a hotrod or race car with this lineup of 4L80E valvebodies. Manual valvebodies are available with or without transbrake function, and with or without converter lockup. Offered in six different styles and counting. Available in US domestic billet aluminum and select OE-based options.

### POWERGLIDE VALVEBODIES

Hipster's Brake Powerglide transbrake valvebodies. Choose from a fast billet aluminum brake or the original cast iron Hipster Brake while cores last. High gear leave and internal converter feed dump options are available.

## CALVERT RACING

calvertracing.com | 661-728-9600

### CALTRACS MX

CalTracs work best with links parallel on the ground; MX Kits offer 12 adjustment settings to get a car in the best position. Kit includes 3-Hole MX Mounts, 4-Hole MX Plates, upgraded hardware, links, Heim joints. For most leafspring cars, small trucks. Parts available to upgrade your current CalTracs, too.

### HR HIGH RESISTANCE REAR SHOCKS

Higher resistance of separation and rebound on hard acceleration of drag racing keeps tires planted and under your control. External dial to easily refine rebound rate for racing or street driving. Twin tube design with heavy-duty 5/8-inch shaft, includes required hardware. Shock mounting bolt and stud kits available.

### SPLIT MONO LEAFSPRINGS

Unique, split parabolic springs are thicker toward the middle and overlapped for maximum strength on stress points during hard launches. Manufactured stiffer spring rate designed for drag racing. Includes centering pins, heavy-duty spring clamps, spring eye bushings. Also available for 1500 Series Trucks. Designed for use with CalTracs.

### CF FRONT RACING SHOCKS

Fast separation for maximum control. Dual stage compression valving absorbs hard hits, settles at the top end. Lightweight, industrial design works right out of the box. All required hardware included. Designed for drag racing. Not recommended for street driving. Cost effective.

## COMPETITION CLUTCH

competitionclutch.com | 714-410-1958

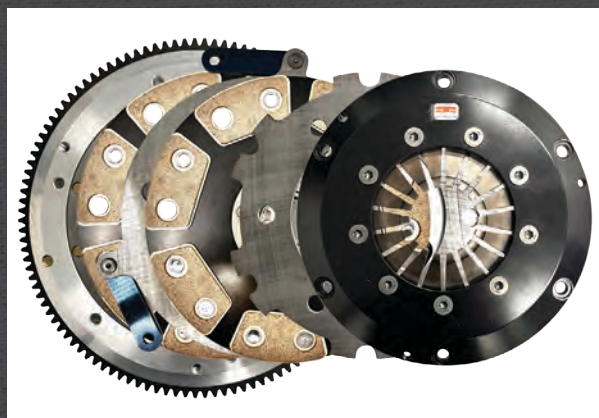

### 245 SERIES TWIN DISC CLUTCH KITS

The Competition Clutch 245 Series twin disc clutch kit is an economically priced kit and is intended for high-horsepower street cars. With a choice of ceramic (1000-horsepower) or organic (800-horsepower) discs, this clutch can handle high horsepower and still remain street-able. These kits will provide smooth engagement with a soft pedal effort to make this ideal for the street performance enthusiast. The kits include a billet aluminum flywheel.

### 184 SERIES TWIN AND TRIPLE DISC CLUTCHES

The Competition Clutch Twin and Triple disc clutches provide an economical racing clutch for the active sport compact enthusiast. These ceramic clutch kits come with a 4140 forged flywheel and a 6061 T6 aluminum cover complemented with a 6150 steel diaphragm. These units are rated to hold 1,000–1,500-horsepower, depending on application.

### 200 SERIES CLUTCH KITS

Race Version 200 Series Clutch Kits are sintered iron disc, made for extended life and holding power. Made with pin drive floaters for durability on track with an aluminum cover for reduced weight. The Street Version Series Clutch Kits are semi-metallic discs for added holding power and smooth engagement. Strapped floater for no floater rattle with soft cone for easier pedal effort.

## E-MOTOR USA

emotorusa.com | 219-670-7683 (phone & text)

### STAINLESS STEEL PIPES, HIGH-QUALITY HANGERS & CLAMPS

A wide range of high-quality hangers, stainless steel pipes, and clamps are available that are designed to meet performance industrial and commercial requirements and more.

### TRIANGULATED FOUR-LINK REAR SUSPENSION FOR FORD, CHEVY, GMC & MORE

A number of options and applications to choose from: 180-/200-/250-/300-/350-/400-pound coilovers and more.

### SS DUAL 4-INCH TIP MUFFLER CATBACK EXHAUST FOR 1997-2004 CHEVY CORVETTE

1997-2004 Chevy Corvette C5/Z06 5.7L LS V8 and more models.

### 1968-1972 COILOVER/CONTROL ARMS/TRAILING ARMS KIT

Front coilover plus front and rear upper and lower tubular control arm, rear control arms, brace and upper lower trailing suspension kit for 1968-1972 Chevelle Monte Carlo GTO A body and more models.

## FTI PERFORMANCE

ftiperformance.com | 386-736-5816

### 10R80 TORQUE CONVERTER

FTI Performance offers the 10R80 torque converters for both the Mustang and F-150 trucks. The 9.5-inch billet lock up street racer converter for the Mustang includes billet stators and lock up piston to eliminate premature clutch wear, was designed for 1,000 hp, and has a three-year warranty. The 10-inch billet lock up street racer converter for the F-150 was computer designed, and includes a CNC-machined billet stator and billet lock up piston, works with 2,800–4,400 rpm stall options.

### 4L80E TRANSMISSION KITS

A customer has a choice of just ordering the Level 2, Level 3, or Level 4 4L80E transmission to plug into their existing combination. Or customers can order a transmission kit that will include the SRLS4 torque converter, dipstick, and Red Line Oil automatic transmission fluid. The Street Racer Lock up converter is a 9.5-inch billet lock up converter that offers performance and reliability for the weekend warrior.

### SFI-RATED TRANSMISSION CASE AND BELLHOUSINGS

This two-piece Powerglide case is adaptable to multiple bellhousings that allows for multiple different brand engines to be compatible. FTI Performance takes pride in the precision casting and in-house machining for an accurate and strong fit. With FTI's buying power that translates directly to a great price.

### TH400 BILLET VALVE BODY

The TH400 valve body is reverse pattern, full manual. It is made of billet aluminum to make it lighter and faster compared to OEM cast iron. It is a great upgrade to a trans brake in the future while being more efficient.

## INDEPENDENCE DRIVELINE

independencedriveline.com | 484-384-7278

### DIESEL TORQUE CONVERTER KIT FOR CHRYSLER AS69RC

Performance torque converter kit for the AISIN AS69RC torque converter with upgraded billet piston, lightened clutch hub, piston castle, and dual bolt circle cover.

### 245-MM TORQUE CONVERTER KIT FOR FORD AODE/4R70 BILLET SINGLE DISC

245-millimeter billet torque converter component kit for the 4R70W and AODE converters. Kit includes billet cover, lock up piston, chromoly impeller hub, hardened turbine hub, sprag center, and performance bearing package.

### POWERGLIDE PLANETARY SETS 1.80 AND 1.69 RATIOS

Bolt-together planetary sets in various options include 4340 and 300M output material, long and short shaft lengths, 35 spline oversized input available, and 32 spline long and short output shafts available.

## INTERCOMP RACING

intercompracing.com | 763-476-2531

Intercomp®

### EXPERT WEIGH XBT SCALES

Intercomp's Expert Weigh XBT Wireless Racing Scales are ideal for all forms of motorsports. Expert Weigh Scales feature Intercomp's championship winning billet scale pads, now with XBT wireless Bluetooth communication to Intercomp's iRaceWeigh mobile app on a tablet or your own device.

### CLASSIC WEIGH XBT SCALES

Intercomp's NEW Classic Weigh XBT Wireless Scales feature XBT wireless Bluetooth communication to a handheld indicator, a tablet, or your device communicating to Intercomp's iRaceWeigh mobile app. They are designed for all forms of vehicle weighing and motorsports. The system comes standard with a pad storage case on wheels and low-profile pads.

### 150.00 PSI DIGITAL AIR PRESSURE GAUGE

Intercomp's Digital Air Pressure Gauge is the choice of champions for precision air measurement. The gauge reads to 0.01 PSI with a maximum pressure of 150.00 PSI. It boasts an accuracy of 0.1% and has a giant, 1.25-inch backlit display. It displays in PSI, BAR and kg/cm, and comes standard with a 20-inch hose, angle chuck, and carrying case.

### 150.00 PSI DIGITAL MEMORY AIR PRESSURE GAUGE

The next generation of Intercomp Digital Air Pressure Gauges includes memory for 10 sets of pressures and communicates via Bluetooth directly to the iRaceWeigh mobile app. Accuracy is 0.1% and the gauge has a giant, 1.25-inch backlit display and stores pressures IN/HOT, OUT/COLD and GAINS up to 150.00 PSI. It comes standard with a 20-inch hose, angle chuck, and carrying case.

## LONGACRE RACING PRODUCTS

longacreracing.com | 800-423-3110

### ELITE DIGITAL SHOCK INFLATION TOOL

The new Longacre Elite Digital Shock Inflation Tool offers precise, easy shock inflation with a dual pivoting head, digital gauge, and low-flow relief button for fine-tuned pressure control. Durable and portable, it fits all Schrader valves—ideal for racing and performance setups across dirt, drag, road, and asphalt applications.

### DUAL AIR FUEL RATIO GAUGE

The Dual Air Fuel Ratio Gauge delivers precise, real-time data to simplify carburetor tuning and maximize engine performance. Featuring dual-bank monitoring, built-in tachometer, replay function, and compatibility with gasoline-based fuels, it helps racers fine-tune with confidence, prevent lean conditions, and achieve optimal power across all racing applications.

### ELITE SWITCH PANELS

The new Elite Switch Panels from Longacre Racing Products deliver race-ready reliability with rugged, waterproof components and proven motorsport design. Built for dependable performance under pressure, each panel features secure terminals and Weatherpak connectors to reduce failure points and simplify installation—providing racers with confidence and lasting durability.

### ELITE LOAD STICKS

The new Longacre Elite Load Sticks offer precision, convenience, and wireless connectivity via the Longacre Connect app. Featuring a 3,000-pound load capacity, adjustable lengths, and Bluetooth data transfer, they provide quick, accurate load readings at ride height. Compact, durable, and rechargeable, these load sticks simplify setup and enhance race-day performance.

## MCLEOD RACING

mcleodracing.com | 714-360-2764

### PRO PACK CLUTCH KIT FOR MUSTANG AND LS

The McLeod Pro Pack clutch kit is equipped with the Super Street Pro single disc kit, billet steel flywheel, and includes either cable, quadrant, and adjuster for cable-driven applications or hydraulic bearing and stainless-steel line for hydraulic-actuated applications. The included billet steel flywheel is ideal for easy stop light acceleration. The complete kit is rated up to 500 hp.

### CLUTCH COOLER PRO

The Clutch Cooler Pro is an innovative "cooling" system to reduce temperatures in the bellhousing, prolonging clutch life. The unit bolts directly to the lower part of the bellhousing, replacing an existing dust shield. The system includes the cooler motor, motor mount, 5-feet of cooler tubing, and hardware.

### RXT 1200 TWIN DISC CLUTCH KIT

Intended for the high-horsepower street/strip fan, the RXT1200 twin disc clutch kit can handle 1,200 horsepower. This kit can handle serious horsepower and remain street able. Ceramic-lined clutch discs provide smooth engagement with a moderate pedal effort. Steel and aluminum flywheels are available for this kit depending on the application.

### 7.25-INCH 4 DISC CLUTCH KIT FOR SAND RAIL WITH THE ALBINS TRANSMISSION

Holding capacity of 22,000-ft./lbs. of torque to the tires. Four iron compound discs with a thicker disc core plate, which eliminates disc cracking. Engineered stronger hat structure for increased longevity. With the steel billet flywheel, this kit is properly weighted for optimal performance while keeping the best drivability. This lighter clutch holds more power to perform in any situation.

## SPEEDHUT

speedhut.com | 801-221-1460

# SPEEDHUT

### SPEEDBOX

The Speedhut SPEEDBOX converts modern GPS/VSS signals to a mechanical drive for cable-driven speedometers. The simple, plug-n-play solution requiring only power and ground, eliminating manual calibration. With a 7/8-inch, 18 thread and up to 1,650 turns/mile range, it's a versatile electronic upgrade for any vehicle's mechanical speedometer.

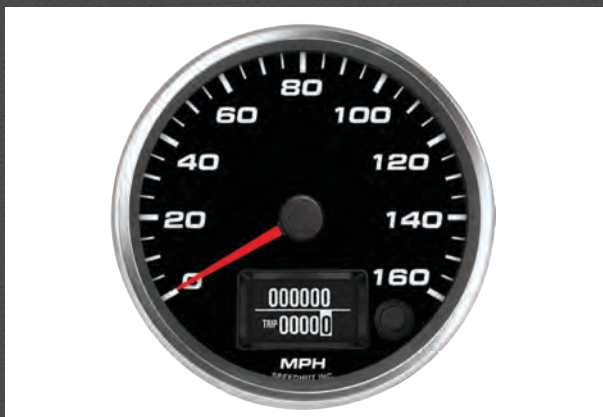

### STANDALONE AIR/FUEL WIDEBAND WITH ANALOG OUT GAUGE

Speedhut's Standalone Air/Fuel Wideband Gauge features a built-in controller and comes with an LSU 4.9 O2 sensor for precise, real-time air/fuel ratio monitoring, typically 8.5 to 18 AFR or 0.6 to 1.2 Lambda. It uses a digital stepper motor for accuracy, has an internal microprocessor, and offers an analog output for datalogging, sized 2 1/16 inches or 2 5/8 inches.

### 8K TACHOMETER WITH SHIFT-LIGHTS

The Speedhut Shift-Light Tachometer offers high-precision rpm readings via bright shift lights. Compatible with any gas engine, it is easily calibrated from 1/2 to 6 pulses per rev. This rugged, easy-to-install tool provides superior performance monitoring for maximum engine efficiency, sized 2 1/16, 2 5/8, 3 3/8, 4, and 4 1/2 inches.

### 160 MPH GPS SPEEDOMETER

The GPS speedometer provides instant, accurate speed data via free worldwide GPS signals, requiring no sensors, calibration, or subscriptions. Compatible with any transmission and installs easily by mounting the waterproof antenna. Ideal for swaps, custom builds, or off-road use where traditional sensors are impractical, sized, 3 3/8, 4, and 4 1/2 inches.

Check out the new sinister looking black tanks with all the same great features standard, but in a tough black ceramic coating. The last thing you need to worry about is whether your oil reservoir is up to the task. Winners know the benefits of sticking with the industry leader provides peace of mind. The unique internal baffling creates exceptional deaeration of scavenged oil while maintaining a tall column of oil over the pickup ensuring that your engine never misses a beat. Now worry can be left to the competition.

### REVMAX BILLET 68RFE V2.0 "TUNELESS" VALVE BODY

6061 billet aluminum channel plate with precision cutouts. Triple-seal billet accumulator pistons for improved reliability and shift quality. Upgraded steel accumulator plate with no-drill technology. Tuneless separator plate design to eliminate cross leaks, warpage, and reroute fluid flow. Designed to run up to 210 psi line pressure with zero transmission tuning. Built and hand-assembled in Charlotte, North Carolina, by RevMax professionals.

[sportech-engineering.com](http://sportech-engineering.com)

### **STRANGE ENGINEERING EVO 4 DDM STAINLESS STEEL BRAKE KIT**

DDM system secures the rotor and allows for rotor thermal expansion, drastically reducing warping, coning, and cracking, which are common with bolt retention designs. DDM system design is secured by an internal Spirolox, eliminating heavy bolts and hardware, further reducing rotating weight. Evolution S rotors are machined and fully ground from stainless steel that exhibits 48% greater yield strength at 1,000 degrees F compared to carbon steel, further maintaining rotor integrity. Unique Aero Slot design reduces rotating weight and promotes even heat dissipation compared to common round drilled holes.

Contact: 847-663-1701  
[strangeengineering.net](http://strangeengineering.net)

### **SWIFT FILTERS C8 DCT TRANSMISSION FILTER REPLACEMENT KIT**

Stainless-steel mesh on both the inside and outside. Anodized billet aluminum end caps are machined in-house. Stainless steel body. Redesigned internal bypass valve. Fits Corvette's dual-clutch Tremec GM TR-9080 DCT transmission filter, transaxle model years 2020 and up. Works with both stock and modified Corvette Stingray models.

Contact: 440-735-0995  
[swiftfilters.com](http://swiftfilters.com)

### **SWIFT SPRINGS USA 10-INCH PROGRESSIVE SPRING**

PN 100-250-575V, the spring is constructed from the company's proprietary HS5.TW material. Rates at 10-inch length with a 2.5-inch inner diameter. This is a true progressive rate that is designed to work without rubbers: -400 @ static, 650 @ 1-inch, 1080 @ 2-inch, -450 @ static, 700 @ 1-inch, 1,190 @ 2-inch.

## 2 CHASSIS, DRIVELINE & SUSPENSION COMPONENTS

### TICK PERFORMANCE ENDLESS ROTATION STEERING CONNECTOR

Revolutionize a steering setup with Tick Performance's Endless Rotation Steering Connector. Built for seamless performance and unlimited rotation. Featuring three circuits plus a common wire, gold-plated contacts, and a lightweight, 10-ounce design, it's purpose-built for ECU or relay activation. Compatible with 1.25-inch columns, five- or six-bolt wheels, and quick-connect hubs.

Contact: 336-719-0599  
[tick-performance.com](http://tick-performance.com)

### TRANSMISSION SPECIALTIES 1,000HP STAGE 3 4L80-E TRANSMISSION

Performance clutches and shift kit. Upgraded boost valve, regulator, and TCC regulator valve. 300M billet-steel input shaft. New bushings, bearings, wiring, and solenoids. Rollerized billet-steel forward clutch hub. Heavy-duty intermediate piston retainer.

Contact: 610-485-9110  
[tsirace.com](http://tsirace.com)

### WAVETRAC DIFFERENTIALS WAVETRAC LIMITED SLIP FOR QUICK-CHANGE

The Wavetrac's patented design makes for a very predictable, smooth addition of power when you need it most—when things are at their limits. Smooth is fast. Made in the USA. Limited lifetime warranty. 140-plus applications, including quick-change and Ford 9-inch.

Contact: 949-362-8700  
[wavetrac.net](http://wavetrac.net)

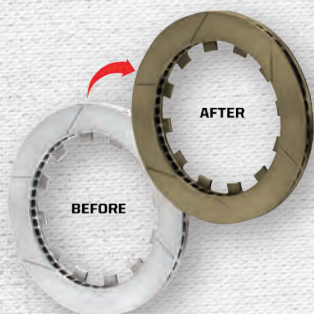

### WEBCO INDUSTRIES FINISHLINE CRMO

Webco's American-made FinishLine tubing delivers mechanical and dimensional consistency well beyond the industry standard. It is readily available in 4130 (FinishLineCrMo and FinishLineHS) grade material. Available in various diameters and wall combinations, Webco tubing provides a competitive edge for chassis tubing, roll cages, and other critical components.

Contact: 630-545-4470

### WILWOOD ENGINEERING BURNISHED ROTORS

Wilwood's new burnishing process for Spec37 rotors saves racers time by eliminating the pre-bedding process and improving performance. Burnishing removes impurities and oils introduced during the machining process. No unnecessary heat cycles, increasing the life expectancy of iron rotors. Superior to traditional dyno or track bedding and ensures a race-ready, heat-cycled surface.

# RACING COMPONENTS, ACCESSORIES & SERVICES

All race car builds need ancillary products or services to be effective in a race season. The offerings on the following pages are sure to optimize your program. Looking for a new trailer?

Maybe, a new supplier for specialized lubricants?

These companies provide all the right racing components or services aimed to improve the race program.

# ASHCROFT

**ASHCROFT®**  
Trust the shield.®

## S1 PRESSURE TRANSDUCER

Designed for high-volume manufacturing with high-quality, low cost and quick lead times. All stainless-steel, thin-film pressure CVD-based sensor technology for exceptional cycle life and repeatability. Outstanding shock and vibration resistance. IP65 and/or IP67 levels of ingress protection.

## G2 AND G3 PRESSURE TRANSDUCERS

G2: Field-proven sensor; all stainless-steel wetted materials provide excellent overpressure capability and durability. G3: All 316L stainless steel wetted materials for installations in pressures as low as 100 in. H<sub>2</sub>O. Both G2 and G3 highly configurable with wide selection of pressure connections, outputs, and electrical terminations.

## GV PRESSURE TRANSDUCER

All-welded sensor and pressure connection designed for high-vibration applications. Field-proven polysilicon thin-film pressure sensor provides excellent overpressure capability and outstanding durability despite substantial shock and vibration. Highly configurable with wide selection of pressure connections and electrical terminations.

## DG25 DIGITAL PRESSURE GAUGE

All-welded sensor and pressure connection provide reliable vehicle support in pit lane. Available in a wide variety of pressure ranges, connections and optional features, including backlit display and rubber protection boot. Provides menu-driven features including unit select, min/max hold, and dampening.

## CHAMPCAR ENDURANCE SERIES

champcar.org | 434-996-6721

### COMPETITIVE PRODUCT

ChampCar delivers competitive racing with a unique approach to classing cars in order to ensure a close field. Teams focus on race strategy, consistent lap times, and managing fuel and driver stints to stay competitive.

### AFFORDABLE PRODUCT

ChampCar was explicitly founded to offer an affordable path to racing associated with a more professional series. The Series is widely considered an affordable option for getting into genuine wheel-to-wheel endurance road racing.

### ACCESSIBLE PRODUCT

ChampCar was founded with the mission of making competitive road racing accessible to amateurs. For aspiring racers, the barrier to entry is low. The focus is on camaraderie and getting drivers on track with minimal hassle.

### COMMUNITY-FOCUSED PRODUCT

ChampCar fosters a strong sense of teamwork. Many teams consist of friends, family, and other enthusiasts who race together as a shared experience. Some of the most rewarding aspects of the series come from building friendships and hanging out with teammates.

## CTECH MANUFACTURING

ctechmanufacturing.com | 715-355-8842

### ECONO TRAILER OVERHEAD (72-INCH)

The Econo Trailer Overhead (72-inch) is built from lightweight aluminum alloy and designed with MotionLatch handles and gas shock stays for smooth, secure operation. Its open back and top panels simplify installation and reduce weight, and it ships fully assembled within one to two business days.

### ULTRA10 GARAGE CABINET PACKAGE

The ULTRA10 Garage Cabinet Package features integrated LED lighting for a professional finish, adjustable feet and shelving for easy setup, and smooth radius corners for safety and style. It can also be extensively customized using the interactive online builder to fit your exact needs.

### CONFIGURABLE MINI NITRO CART

The Mini Nitro Cart includes a nitrogen cradle in the lower chassis, dual storage sections with MotionLatch handles, and a seamless worktop for heavy-duty repairs or everyday tasks. Choose between the standard Mini Cart or the larger Mini Nitro Cart size and customize color and drawer stacks easily with the online builder.

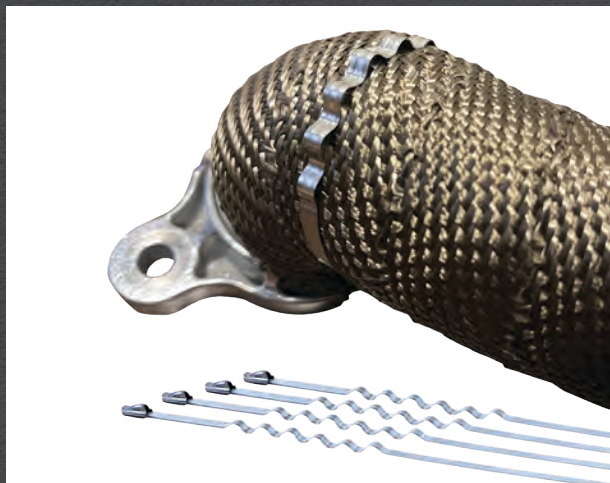

### HALFASS SERVICE CART W/ MOTIONLATCH DRAWER

The HalfAss Service Cart with MotionLatch drawer features airless HalfAss Casters for smooth, easy movement, a MotionLatch drawer for convenient tool storage, and a removable tray for quick cleaning. All components are powder coated before assembly for maximum durability.

## DESIGN ENGINEERING, INC.

designengineering.com | 440-930-7940

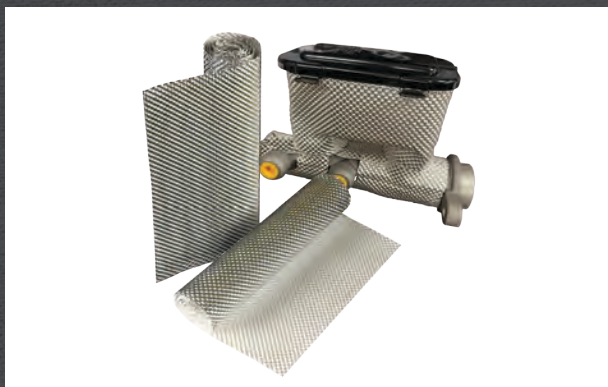

### LOKJAW STAINLESS STEEL LOCKING TIES

Engineered for maximum grip and constant tension, LokJaw stainless steel ties feature a unique spring-wave design that makes them easy to get tight, and maintain constant pressure, allowing ties to be tight and remain secure. Made from 316 stainless steel, they deliver a strong, permanent hold in high-heat, high-vibration environments.

### GEN3 TURBO SHIELDS

GEN-3 Turbo Shields are a technologically advanced turbo shield. Featuring a basalt cover, fully coated in silicone to make seams four times as strong as other turbo shields, multiple stainless steel and silica inner layers and a stainless mesh liner, GEN3 shields deliver the ultimate in turbo heat protection. The only shield with a two-year warranty.

### ADAPTASHIELD - XT

This ultra-flexible aluminum heat barrier reflects engine and exhaust heat while protecting components from abrasion. Easy to cut and mold to shape, it's fire resistant, and meets FMVSS302 standards. Operating from -40°F to 392°F, its 1.45-mm aluminum and poly-glass construction ensures durable protection while easily conforming to any shape.

### FLOOR & TUNNEL SHIELD

Block extreme heat from penetrating interiors and damaging components. Its lightweight aluminum and glass-fiber construction reflect up to 1750°F, reducing interior temps making passenger compartments cool and comfortable. Ideal for firewalls, tunnels, and floorboards. Available in aluminum and black. Premium heat protection in tight, high-temperature areas.

# HOOSIER PATTERN INC.

hoosierpattern.com | 260-724-9430

## 3D SAND PRINTING

Seven in-house state-of-the-art 3D sand printers print geometrically complex molds and cores, bypassing tooling fabrication while reducing lead times. Increase design freedom and scale production volumes, consolidating components into a single job box. Build envelope is 70.86 x 39.37 x 27.56 inches with an average print time of 22 hours.

## SAND CLEANING

Our sand cleaning department is the last stop sand prints pass through before being packaged and shipped. Our highly trained and detailed employees ensure each mold and core meets quality control standards. A two-check system of an employee and an auditor verifies that every mold and core passes inspection.

## CAD/CAM

CAD/CAM department works with customers to provide foundry tooling for their molding or core machines. CAD/CAM software is integrated and provides 3D modeling and virtual reviews, ensuring tooling is completely right the first time. The team documents each foundry's unique standards and ensures final product meets the exact specifications.

## MACHINING

Hoosier Pattern has been an industry leader in foundry tooling, proudly serving regional and national clients from small jobs to large-scale projects. Over 30 machining centers, including vertical, horizontal, 5-axis, and lathes. Shrink-fit tooling and Haimer tool pre-setter ensure optimal balance, accuracy, and tight tolerances while delivering precision.

## JMS PERFORMANCE

jmschip.com | 601-766-9424

### CD-1 SS RACE IGNITION KIT

Plug and play – Captive Discharge Racing Ignition System CD1. Approved racing ignition for Southern Super Series, CARS Super Late Model Tour, SRL Southwest Tour, American Canadian Tour, and all dirt late models.

### SMARTSPARK LS IGNITION SYSTEM

Precision ignition control for all 24x and 58x LS engines. Plug-and-play simplicity with customizable timing and data logging. Engineered for street, drag strip, and race applications.

### FUEL MAX

Fuel Pump Voltage Booster featuring exclusive digital technology that provides up to an 85% increase in fuel. Plug-and-play installation connects directly to the fuel pump driver module and activates via the pedal position sensor, minimizing install time. User-adjustable voltage ramp-in/out rate allows elimination of fuel pressure spikes.

### PEDAL MAX

Designed for modern vehicles equipped with electronic throttle control systems. Improved throttle response and acceleration, reduced lag in turbo applications, leading to more power and torque. Easy to install inline between a vehicle's pedal position sensor and vehicle harness, utilizing OEM connectors with a control dial making performance adjustable on-the-fly.

# MAXIMA RACING OILS

maximausa.com | 619-449-5000

## STEP 1: ASSEMBLY LUBE

Lubricant designed to form a durable protective film on moving components. Formulated with 2X Zinc anti-wear system that activates at both high and low temperatures. Prevents metal-to-metal contact after startup. Non-foaming formulation easily dissolves into both mineral and synthetic oils.

## STEP 2: ASSEMBLY GREASE

High-performance assembly grease that excels in a multitude of heavy- and light-duty applications. Unique calcium sulfonate complex soap thickener combines with a proprietary additive system to deliver thermal stability and extreme pressure performance. Oil-soluble formulation won't clog filters and provides protection against corrosion, water washout, and wear.

## STEP 3: PERFORMANCE BREAK-IN OIL

Mineral-based engine oil specifically formulated for breaking in engines with flat tappet camshafts, roller elements, and where maximum anti-wear performance is needed. High ZDDP formulation combines the highest quality mineral base stocks with a shear-stable polymer system to provide fast and effective ring seal. Proprietary additive system utilizes a complex, low temperature activating 2X Zinc system that ensures immediate and lasting protection.

## STEP 4: CHOOSE YOUR LEVEL OF PERFORMANCE

Mineral-based engine oil developed formulation utilizes a 2X Zinc system combined with stay-in-place chemistry for protection during every run. Semi-synthetic, ester-based engine oil designed to ensure optimum protection and peak performance for race and hot rod engines. Full-synthetic, triple ester racing engine oil designed to ensure maximum performance while providing maximum protection under the most severe conditions.

## PENSKE RACING SHOCKS

penskeshocks.com | 610-375-6180

### S-LINK DYNO

Penske Racing Shocks' smoothest, quietest, and most advanced shock dyno yet features a newly designed crank with four interchangeable strokes: 0.5, 1, 1.5, and 2 inches—also available in metric. Performance with up to 18 inches/sec speeds and 2,000-lbs. load capacity. Silent operation with direct drive and helical gears for minimal backlash. MTS Shock6 software for industry-standard testing.

### SHOCK BUILDS / AROUND THE SHOP

Penske Racing Shocks provides dyno testing, custom shock rebuilds and re-valving, personalized suspension setup, custom manufacturing, and technical support to optimize performance for automotive, motorcycle, and off-road racing applications. Its expert technicians offer both on-site track support and facility-based services, backed by over 100 years of combined motorsports expertise to deliver truly custom solutions for racers at every level.

### SHOCKS

Penske Racing Shocks stands at the forefront of shock absorber technology, delivering premium solutions for automotive, motorcycle, and off-road applications. Each shock is precision-machined from billet material and meticulously assembled by hand—never mass-produced, never outsourced. With no shortcuts in manufacturing, every product receives dedicated craftsmanship and attention to detail, ensuring exceptional durability, performance, and consistency on every ride.

### MACHINE SHOP

Penske Racing Shocks provides precision CNC manufacturing for shock absorber components and other high-performance parts. It specializes in steel and aluminum applications, delivering highly repeatable, durable parts for extreme conditions. With advanced equipment including Mazak, Okuma, Tsugami, HAAS, and REM, it maintains  $\pm 0.0005$ -inch tolerances and performs routine first article and production inspections to ensure quality and minimize scrap—ultimately reducing production costs.

## PERFORMANCE PLUS GLOBAL LOGISTICS

pplusglobal.com | 636-946-7587

### LOGISTIC SOLUTIONS

Official logistics partner of the performance industry. Performance Plus manages the logistics needs of customers with the highest quality service at competitive prices. Performance Plus's mission is to exceed customer expectations by providing 'Best in Class' custom solutions. Performance Plus provides each customer with a dedicated professional with experience in performance and transportation.

# RACECEIVER

raceceiver.com | 866-301-7223

## WIRELESS TRACK LIGHTS

The three-color track light (red, green, flashing yellow) and two-color pit light (red, green) run on battery or AC with plug-and-play setup. Featuring long-range radios with optional repeaters, IP67 water and dust protection, seamless existing light integration, and easy mounting. Full track control.

## LITECEIVER IMPACT

The LITEceiver Impact displays all racing flags with instantaneous wireless communication while adding G-force crash alerts for safety. Bright status LEDs, rechargeable long-life battery, and simple roll bar or dash mounting make it rugged, reliable, and essential for smooth, safe racing with faster response for all drivers.

## ELEMENT

The RACEceiver Element is a rugged, water- and dust-resistant one-way racing radio with crisp, loud audio. It features a rechargeable Li-ion battery delivering up to 24-hour runtime, a button-lock to prevent accidental channel changes, and pre-programmed channels—keeping competitors informed, safe, and focused on the race.

## TRADE UP & SAVE BIG AT PRI

Got a well-used RACEceiver? Bring it to PRI Booth 452 and trade it in for a brand-new unit at a deeply discounted price. Don't miss this chance to upgrade the race-day experience with clearer reception, better performance, and more reliability. This PRI Show only—while supplies last.

## RACING ELECTRONICS

racingelectronics.com | 800-272-7111

### SOUNDGEAR RACING RECEIVERS

High-quality materials and expert fit offer improved sound quality while reducing noise.

### RACING ELECTRONICS RE4

Custom ear molds with premium quality 18-inch or 36-inch mono cable and 1/8-inch male jack. Available in stereo, too.

### SOUNDGEAR PHANTOM

Custom fit, rechargeable, and Bluetooth-compatible hearing device.

### SOUNDGEAR SHIELD

Small and light, Shield delivers dynamic digital hearing protection.

# SCHAEFFER MANUFACTURING CO.

[schaefferoil.com](http://schaefferoil.com) | 314-865-4100

## MICRON MOLY RACING OIL 10W-30

Micron Moly 10W-30 resists separating from alcohol-based fuels. It includes extra zinc to protect flat tappet cam engines and other components from wear, and extra protection for when engines are operating at higher temperatures. It keeps engines clean from harmful debris and buildup and reduces oil consumption.

## MICRON MOLY RACING OIL SAE 70

Micron Moly SAE 70 resists separating from alcohol-based fuels. It includes extra zinc to protect flat tappet cam engines and other components from wear. It provides extra protection for when engines are operating at higher temperatures. It keeps engines clean from harmful debris and buildup and reduces oil consumption.

## PENETRO 90 PENETRATING OIL

Penetro 90 is excellent on heim joints, wheel studs, and weight jack bolts that have become difficult to operate. It prevents thread stripping and busts through rust. It protects against corrosion, rust, and abrasive particles, plus it frees stuck and rusted parts but doesn't affect seal materials or coatings.

## SUPREME GEAR LUBE 75W-90

Supreme Gear Lube 75W-90 reduces operating temperatures. It has enhanced thermal and oxidative stability and durability. It has excellent extreme pressure properties to protect against wear. It offers enhanced gear, bearing, and seal cleanliness, plus is compatible with all types of seals.

## THERMO TEC AUTOMOTIVE

thermotec.com | 800-274-8437

### ADHESIVE-BACKED HEAT BARRIER

This adhesive-backed heat barrier shields components from radiant heat with its aluminized finish and woven silica material. It handles up to 300°F of direct heat and 2,000°F of radiant heat. It is easy to apply on any surface or wrap around hoses and wires for a professional look.

### ULTRA-LITE INSULATING MAT

This Ultra-Lite insulating mat reduces intense heat for race car drivers and utilizes cutting-edge materials and Thermal Conduction Technology (TCT). It reflects and disperses heat with a highly textured aluminum composite surface. Its high-temperature synthetic felt center insulates against radiant heat and keeps floorboards cooler and more comfortable in extreme conditions.

### EXPRESS SLEEVE

Express Sleeve is the ultimate solution for wire, hose, and cable protection. With a hook-and-loop closure, it's easy to apply. Combining high-temperature insulation with a reflective Mylar foil, it reflects over 90% of heat up to 2,000°F. It is available in various sizes and lengths, and is made in the USA.

### EXHAUST WRAP

Experience more horsepower and reduced under-hood temperatures by using this exhaust wrap. It was developed over 30 years ago, and it maintains hotter exhaust gases for faster exit and increased scavenging. It withstands up to 2,000°F, is asbestos-free, and won't over-insulate thanks to Thermal Conduction Technology (TCT) coating, ensuring optimal heat control.

### 100GROUP PAYMENT PROCESSING

100Group provides payment processing services to all types of businesses within the racing industry, with a heavy focus on race tracks and supporting services. 100Group is partnered with a number of software providers, including race and shop management for integrated payment services.

Contact: 470-632-4181

[100group.com](http://100group.com)

### ALTRONICS PERFORMAIRE PRO WEATHER SYSTEM

The PerformAIRE PRO is the latest in professional-grade precision weather measurement and data collection in a self-contained system. Self-contained unit for race performance prediction. PC-based data collection and forecasting. Transmits info via paging or smartphone text. Paging works independently for weather data only. Rainproof enclosure mounts with extension pole. Single-cable PC connection.

Contact: 847-923-0002

[altronicsinc.com](http://altronicsinc.com)

### ANDERSON COMPOSITES CARBON-FIBER HARNESS BAR FOR 2015-2025 FORD MUSTANG

Autoclave process with pre-preg 3K, 2x2 twill carbon-fiber cloth external surface, and 170 unidirectional pre-preg carbon fiber cloth internal construction. Automotive grade matte clear coat with UV inhibitors applied to protect the surface. Mounts with OE hardware (not included). Harness bar mounting points use existing seatbelt mounting points. Compatible with both OE and most aftermarket racing seats and harnesses. For off-road use only, not for street use. Autocross, drag race or track vehicles. Verify use with your sanctioning body.

### ETS RACING FUELS XPRODRAG 3

XPRODRAG 3 is ETS Racing Fuel's latest innovation for high-compression-ratio engines. The fuel is best suited for drag racing, drifting, or oval racing applications that allow oxygenated fuels.

Contact: 704-552-3875  
[us.etsracingfuels.com](http://us.etsracingfuels.com)

### EVOLVE LUBRICANTS EVOSYN

Evolve created and introduced the world's first high-performance, renewable, nontoxic motor oils meeting and exceeding API and ACEA manufacturer requirements. The oil is also designed to produce a more consistent film thickness under a wider range of operating conditions, producing a higher performance engine oil for a given viscosity grade. The lower Noack volatility results in a higher flash point than an equivalent grade of PAO oil and consequently improves heat transfer from higher thermal conductivity and heat capacity for even lower viscosities.

### LIQUI MOLY NORTH AMERICA MOLYGEN NEW GENERATION 5W-50

Fully synthetic Liqui Moly specialty engine oil is blended with a unique additive technology. The powerful formula prevents the formation of deposits while simultaneously reducing friction. Molygen New Generation reduces fuel consumption and increases engine life due to its high-quality ingredients. Proven and suited for various off-road applications (race/track use) and modified engines. This oil carries an API SN performance specification. Key features include outstanding engine cleanliness, superior high and low temperature behavior, optimum stability to aging, outstanding shear resistance, and instant lubrication after cold starts. Ideal with turbochargers and catalytic converters. Remains stronger longer between oil change intervals.

**VP RACING****5.5-GALLON MOTORSPORT  
CONTAINER UTILITY JUG**

These 5.5-gallon Motorsport Container utility jugs are available in shades that can't be ignored. They're built tough for the track, the pits, and everywhere in between. Motorsport Containers are manufactured and sold by VP Racing's authorized licensee Plastic Product Formers, Inc. The square, 5.5-gallon Motorsport Container utility jug provides more capacity than a standard 5-gallon jug. The container's wide bottom grip and contoured, ergonomic handle make dispensing and transporting easy and fast. These containers are durable and built to last, and are backed with a limited three-year warranty against cracks, leaks, and splitting. Each jug is put through a 15-point quality test. All Motorsport Container utility jugs are proudly made in the USA.

# MACHINERY, TOOLS & EQUIPMENT

New equipment can increase efficiency, improve productivity, and enhance the bottom line. Check out specialized machinery and equipment that excels in honing, welding, cutting, grinding, and more on the following pages.

## CML USA

ercolina-usa.com | 563-391-7700

### 0130G JOLLY JUNIOR MANUAL HYDRAULIC HANDHELD TUBE BENDER

Ercolina introduces the 0130G Jolly Junior, a compact and reliable tube bender designed for precision applications in HVAC systems, hydraulic tubing, and brake line fabrication. Engineered for both performance and portability, the Jolly Junior is an excellent solution for professionals who demand consistent, high-quality bends in a lightweight and user-friendly package.

### 48 PLUS ROTARY DRAW TUBE & PIPE BENDER

The 48 Plus Rotary Draw Bender bends to 2-inch tube and is engineered to simplify operation and deliver precise, repeatable bends with minimal setup time ensuring consistent, high-quality results. Designed for efficiency and ease of use, complex programming is eliminated - allowing fabricators to store bend angles in seconds.

### CE40MR3 MANUAL ANGLE ROLL - SECTION BENDER

Ercolina's CE40MR3 Angle Roll is capable of bending to 2-inch Capacity Sch. 40 Pipe and angle iron. Engineered for versatility, precision, and durability in demanding roll bending applications, the CE40MR3 can operate in both vertical and horizontal orientations, making it ideal for a wide range of shop layouts and project requirements.

### PEDRAZZOLI SUPER BROWN 350 MRM - MANUAL CIRCULAR COLD SAW

A workhorse in circular cold saws, the original Super Brown 350 by Pedrazzoli is crafted for fabrication shops seeking secure and swift cutting of both ferrous and nonferrous tubes, pipes, and profiles with minimal post-cut cleanup. Each Pedrazzoli saw boasts a robust, heavy-duty cast iron base that effectively dampens vibrations during the cutting cycle.

# COMEC

comecus.com | 800-887-6076

## ACF200CNC BORING MILL

The Comec CNC Boring Mill includes tooling for diameters from 2.3- to 6.7-inches and a CBN/PCD milling plate with basic fixturing. Large base casting and spindle loading caddy are standard. It features the Comec Fas-Tec series control, ballscrew drives, brushless servomotors, linear slides, and a dual touchscreen control with electronic handwheel.

## RP1400CNC AUTOMATIC HEAD & BLOCK SURFACER

Comec RP1400CNC Surfacar accommodates both small and large heads and blocks. Sixteen-inch CBN/PCD cutter plate, ballscrew drive, Fas-Tec touchscreen control. Automatic or manual operation, cutter and column height stored in memory for fast set up. Laser surface scanning is standard, large work envelope for V-block fixtures, and large inline diesel parts.

## LBM 950 CNC LINE BORING MACHINE

The Comec Fas-Tec Control allows both manual and automatic operation, servo motor/ballscrew linear drive with electronic handwheel and touchscreen control. Twenty-three-mm standard boring bar allows 0.95- to 3.34-inch boring diameter. Standard and optional fixturing allows line boring both heads and blocks.

## RV516ASM CENTERLESS VALVE REFACTOR

Accurate and repeatable centerless chuck design. Four-millimeters up to 5/8-inch valve stem diameter. Handles valve head diameters up to 4 inches. Variable speed workhead, micrometer feed butt grinder and included base cabinet are standard.

# HEIDENHAIN CORP.

heidenhain.com | 847-490-7820

## HEIDENHAIN

### TNC7 CONTOURING CONTROL

Intuitive, task-focused CNC with multi-touch operation, customizable screens, and smart probing functions. Supports milling, turning, and grinding with fast block processing, graphical programming, and integrated process monitoring for precision and reliability.

### MILLPWRG2 CNC MILLING CONTROL

Entry-level CNC panel for knee and bed mills. Functions as a DRO, CNC control, or both, with conversational and G-code programming to reduce scrap and improve accuracy.

### DIGITAL READOUTS (DR0100, DR0203, DR0300)

Reliable digital readout systems that deliver real-time feedback, tighter tolerances, and efficient operation for a wide range of milling applications.

### TURNPWR CNC TURNING CONTROL

Control for two-axis turning machines plus spindle. Provides conversational programming, fast setup, and precise feedback to increase throughput.

# IRONTITE PRODUCTS KWIK-WAY VAN NORMAN

rontite.com | 319-377-9421

## KWIK-WAY SVSIID VALVE GRINDER

The Kwik-Way valve grinder SVSIID is an accurate system for refacing valves. The exclusive Kwik-Way Six Ball Centerline Chuck ensures perfect concentricity for reliable and repeatable precision. Guaranteed accurate to .0002-inches with HP Chuck. Backed by solid three-year limited warranty. Made in USA.

## VAN NORMAN FG5000 FLYWHEEL GRINDER

The American-made flywheel grinder. Exclusive solid cast table support means no deflection. Direct Drive Table. Productive and rugged flywheel grinder. Fast grinding for the race industry.

## IRONTITE DIESEL INJECTOR SLEEVE TOOLING

The Iron tite Diesel Injector sleeve removal and installation kits are made in the USA and designed to install the injector tubes to OEM specifications. Made with precision materials, the Iron tite Diesel sleeve kits are made for Cummins, Paccar, Navistar, GM/Detroit Diesel, Volvo/Mack, and Caterpillar.

## IRONTITE CRACK DETECTION AND REPAIR KITS

The Iron tite Crack Repair System is a cold repair process repairing castings. The cold crack repair process does not alter the casting like welding does. The detection and repair kits supply all the tooling needed to return the casting to "Iron tite" condition. Made in USA.

# MAGIDO USA

magidousa.com | 844-462-4436

## HIGH-PRESSURE SERIES

MAGIDO HP parts washers quickly clean parts with a high-pressure spray and detergent. Features include an 870 PSI piston pump, LED lighting, an ergonomic wand, tank heater, liquid sensor, filter, removable chip basket, and easy tank access.

## X-81 SERIES

MAGIDO X-81 top-load parts washers are compact and designed to efficiently clean small to medium parts. They are easy to load and unload, using pressurized hot water and detergents to remove dirt, grease, and grime, reducing manual scrubbing and chemical exposure.

## X-51 SERIES

The X-51 Series features a clamshell design for easy loading and includes an automatic turntable drive, dual spray bars, a tank heater, fluid level sensor, lid safety switch, tank drain, and removable chip basket. These washers optimize throughput, productivity, and profits, making them ideal for your workshop.

## X-53 SERIES

The MAGIDO X-53 Series is ideal for heavy-duty parts washing in production and maintenance operations. Its sturdy front-loading design simplifies loading and automatic cleaning. Wash nozzles and a rotating turntable ensure thorough, precise cleaning. X-53 washers come in several sizes and are a reliable, efficient tool for automotive workshops.

## WHITNEY TOOL COMPANY

whitneytool.com | 812-275-4491

### TUBE NOTCHING CUTTER

Whitney Tool can make tube notching cutters that fit existing mills or lathes. Designed to cut the notch to specific needs. No specialized machine required.

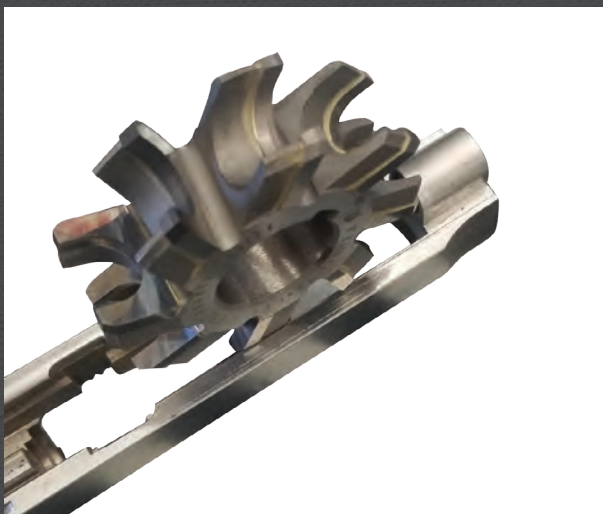

### O-RING CUTTING TOOL

Got an engine component part that needs a groove for an O-ring? Whitney Tool makes specialized cutters to accomplish that task.

### DOUBLE ANGLE SLOTTING CUTTER

Whitney Tool offers several different slotting cutters that can machine venting slots into various styles of workpieces.

### FULL FORM PROFILE ARBOR CUTTER

Whitney Tool offers several different options to design and build arbor style cutters to machine full length forms.

### AIR TURBINE TECHNOLOGY 201SV

The 201SV, from Air Turbine Technology's Straight Hand Tool Series, is a 40,000–90,000-rpm pneumatic pencil grinder. It's powerful at 0.2 hp (0.15 kW), operates with ultra-low vibration, weighs 6 oz. (0.17 kg), and is quiet at under 65 dBA. Reduce injury risk and repetitive stress on your hands and arms. Just connect a 90-psi (6.2-bar) air supply.

Contact: 561-994-0500  
[airturbinetools.com](http://airturbinetools.com)

### AIRCAT PNEUMATIC .75-HP ANGLE SANDER

.75-horsepower non-stall motor with 18,000-rpm spindle lock speed control switch. Male 1/4-inch x 24 spindle to connect the backing pad directly to the tool and greatly reduce overall tool height. Quiet performance at 79 dBA. Weighs less than 2 pounds and is 7.5 inches in length. Includes 2- and 3-inch Roloc style backing pads.

Contact: 561-308-2161  
[aircat.com](http://aircat.com)

### AIRFLOW SYSTEMS AIRFLOW FVH-SERIES

Portable unit for weld fume extraction. Continuous-duty blower. Maintenance-free, high-performance brushless motors. Three-speed motor control for adjustable vacuum. Max vacuum: 180 inches w.g. Extracts weld fumes up to 115 cfm at the gun. Over 99% efficient collection. Simplifies OSHA and insurance compliance. Manual vibration/air filter cleaning system for extended filter life.

Contact: 214-503-8008  
[airflowsystems.com](http://airflowsystems.com)

### ANTIGRAVITY BATTERIES SC-10 SUPER CHARGER

Multi-chemistry, multi-voltage 10-amp charger for 7Ah–200Ah battery capacities. Features LCD digital screen with real-time data, simple two-button control, built-in voltage tester, BMS re-set function, 10-amp power supply ability (14v @ 10A), recondition feature (for lead/acid), automatic winter mode. Accessories include clamps, pigtail, female lighter adapter.

Contact: 310-527-2330  
[antigravitybatteries.com](http://antigravitybatteries.com)

### ASNU CORP. EUROPE ASNU DIGITAL FLOW KIT

Add-on for existing ASNU Classic GDI. Real-time display of injector flow, pressure, and temperature. Automatic pressure control. Automatic injector pass/fail detection. Accurate testing of high-cc injectors. Injector batching functionality. Generates injector deadtime. Create custom test plans.

Contact: +44-2084204494  
[asnu.com](http://asnu.com)

### BLACKSTONE - NEY ULTRASONICS GMC SERIES

GMC offers ultrasonic cleaning systems that are readily available in two standard sizes. The larger variant can handle parts measuring up to 35 inches in one dimension and weighing up to 125 pounds.

Contact: 513-870-0100

**FOUNTAIN INDUSTRIES  
X30 SINK ON DRUM PARTS  
WASHER**

The X30 sink on drum is Fountain Industries' best-selling solvent or aqueous manual parts washer, offering rugged 16GA 304 SS construction, tough field-proven modular assemblies, 75-pound weight capacity, and an upgrade option for waterproof electronics that offers high reliability even in harsh conditions. Ergonomic manual parts cleaning with a sturdy corner-to-corner work surface with value-adding workflow tools, including a flow-through brush and flexible rinse spigot. One-machine modular design for solvent (CleanMaster) and upgradeable to aqueous (EcoMaster) with drop-in heating. No need to replace machines due to regulatory changes.

### FREEDOM RACE LIFTS WIRELESS PORTABLE VEHICLE LIFTS AND JACKS

Portable vehicle lifts that are drill operated or wireless remote control using drill batteries. Lifts and jacks for performance vehicles and vehicles at your home shop.

Contact: 507-358-0091

[freedomvehiclelifts.com](http://freedomvehiclelifts.com)

### GRIP TOOLING TECHNOLOGIES GRIPEDGE TOOLS 14-PIECE BROKEN BOLT EXTRACTION SET (BBX14S)

G-FORS extractors feature a non-tapered, bi-directional geometry providing full sidewall contact with fasteners and secure engagement on 100% rounded fasteners. Compromised fasteners can be reinserted temporarily when replacements are unavailable. Advanced G-FORS technology ensures easy removal of the broken fastener from the tool after extraction.

Contact: 813-390-4830

[gripedgetools.com](http://gripedgetools.com)

### HASTINGS AIR ENERGY CONTROL FUMEVAC ERGOMAX MIG WELDING TORCH

Air-cooled fume-extraction MIG guns. Removes weld fumes. Meets ACGIH and OSHA air quality standards. High-quality, high-duty-cycle MIG and flux-cored welding performance. Durable copper alloy consumables for high conductivity, cool operation, and long life (includes brass diffuser). 360-degree swivel ball-joint for reduced operator fatigue.

### KNKUT 29-PIECE HD HEX SHANK M35 COBALT JOBBER LENGTH DRILL BIT SET

New KnKut USA-made Cobalt drill bits are designed to drill tough, high-tensile materials and work-hardened materials like high-strength alloy steels, stainless steel, titanium, manganese steel, armor plate, and Inconel. The set comes with bits that are 1/16-inch to 1/2-inch by 64ths. The bits feature a 135-degree split point that starts on contact and will not walk, and hex shanks on sizes 3/16-inch and above prevent the drill from slipping in a chuck. KnKut Cobalt drill bits resist heat, allowing our drill bits to stay sharper and last longer.

Contact: 470-359-5759

### MEC CNC MACHINES SG11 EZMATIC SEAT & GUIDE MACHINE

The Robins EZmatic Seat and Guide Machines distributed through MEC CNC are CNC-controlled seat and guide machines designed for precision machining of valve seats and guides in cylinder heads. These machines are suitable for a wide range of applications, from small motorcycle engines to high-performance as well as large diesel and industrial engines. The EZmatic offers both manual and automatic CNC seat cutting capabilities, allowing for easy operation and consistent and accurate machining processes.

PRI #1351 • RACE RETRO #2-304

**VORTEX PRO EQUIPPED ATL SAVER CELLS**

SAY GOODBYE TO FUEL STARVATION | THE ULTIMATE PLUG & PLAY FUEL SYSTEM

**UPDATED FUEL CELL CONTAINER**

IMPROVED MOUNTING + FIA HOLOGRAM WINDOW | AVAILABLE IN ALUMINUM & STEEL

**PORSCHE DUAL DRY BREAK CONVERSION**

NOW AVAILABLE FOR 991, 992.1 GT3 CUP & CAYMAN GT4

DO YOU HAVE #ATLINSIDE?

[SalesTeam@atllinc.com](mailto:SalesTeam@atllinc.com) | [atllinc.com](http://atllinc.com)

LIGHTWEIGHT, AMERICAN MADE STEERING COLUMNS AND ACCESSORIES

**ALL-NEW Adjustable Pro-Fab Column**

Developed to survive the rigors of racing and  
provide a safe, sturdy steering mechanism

Features:

- Lightweight, with adjustable output shaft
- 7" travel on the adjustable output shaft
- Brushed aluminum finish for premium product look and feel
- Sealed Upper Ball Bearing, Delrin Lower Bushing

BENEFITS:

- Lightweight and Durable
- Various mounting systems available
- Installer adjustable for steering wheel placement
- Double-D shaft output makes u-joint alignment easy
- Pairs well with the IDIDIT Push to Connect Quick Release Steering Hub

Push to Connect  
Quick Release Steering Hub

### SUNNEN PRODUCTS CO. SV-35 SERIES

The SV-35 Series is the next generation of the legendary Cylinder King line of honing machines known worldwide. The SV-35 features the all-new Sunnen2 control system, designed in-house by engineers who are experts in honing applications. The machines offer a wide variety of features and flexibility in an affordable package ideal for contract machine shops, automotive performance and rebuilding shops, and mid-volume industrial production facilities.

Contact: 314-781-2100  
[sunnen.com](http://sunnen.com)

### SUPERFLOW DYNAMOMETERS & FLOWBENCHES SF-BLACK WIDOW EX2

Highest-capacity extreme-performance engine dynamometer. Low-speed torque and high-speed power capacity. Configurable: single or dual absorber. Rated 6,000 hp/5,000 lb.-ft. torque. Up to 12,000 rpm testing range. Stainless steel absorbers resist cavitation. Automated, repeatable test sequences.

Contact: 262-252-4301  
[superflow.com](http://superflow.com)

### TEMCO SPRAY CABINET PARTS WASHERS

Parts washers manufactured in Oklahoma since 1978. Two-year parts warranty, 10-year limited cabinet warranty. V-notch top for ease of loading. Powder-coated finish.

Features include an integrated automatic oil skimmer, an evaporation system for less waste water, a small parts basket, a low-water shutoff to protect heaters, a 6-foot power cord with plug and matching receptacle, a powerful horizontal pump at 115 gpm/65 psi, heavy-duty swivel casters with brakes, a removable tank cover, an adjustable thermostat, and a composite turntable drive system.

Contact: 405-471-2758  
[washparts.com](http://washparts.com)

### WALTON COMPANY WALTON TAP EXTRACTORS

Quickly remove broken taps without drilling, lasers, damaged threads, scrapped parts, or repair inserts—and save the threads! Available in every tap size—both inch and metric—as handy sets or individual pieces. Proudly made in the USA.

Contact: 860-523-5231  
[waltontools.com](http://waltontools.com)

### YOURDYNOCOM YOURDYNOCOM AUTOMATED LOAD CONTROL

Automated load control valve kit for water brakes. The kit contains the valve itself (1-, 1.5-, or 2-inch), the servo motor, servo controller, and power supply. Default is pipe connection (1-, 1.5-, or 2-inch NPT thread), or alternatively 1-, 1.5-, or 2-inch hose connection. Very fast and accurate valve, stainless steel heavy-duty construction. Polished stainless steel valve internals for good flow. Easy to install, disassemble, and service if necessary. Electronics are plug-and-play with the YourDyno Ultimate and YourDyno Standard. This valve makes a great combination with the YourDyno Load Control, which is a brake control model made specifically for water brakes.

# RACE TRACK EQUIPMENT & SUPPLIES

As each race season comes to an end, track promoters seek to improve the upcoming season. This section can assist programs with upgrades surrounding concessions, track equipment, maintenance, and more.

### BUFFALO TURBINE BUFFALO TURBINE DEBRIS BLOWERS

When safety is your bottom line, choose Buffalo Turbine. Clear all track debris: wet, slick, rubber. Legendary turbine force air. Models for drag strip, circle track, and road course. Ten-year warranty. Made in USA. Official track blower of NHRA.

Contact: 716-592-2700  
[buffaloturbine.com](http://buffaloturbine.com)

### THE FOD CONTROL CORPORATION FOD-RAZOR MOTORSPORT SWEEPER

Ensure race track safety with the FOD-Razor. Fast and effective. Simple and easy-to-use. Portable. Affordable. Unparalleled capture rate: Collects over 98% of small FOD (foreign object debris) objects. Sweeps smooth and coarse surfaces. Sweeps in both dry and wet weather conditions, including rain.

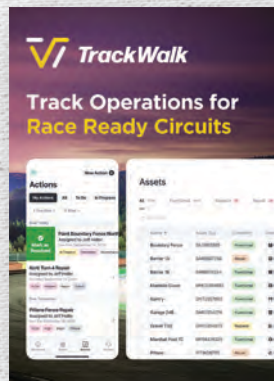

Contact: 800-425-8363  
[fodcontrol.com](http://fodcontrol.com)

### GEOBRUGG NORTH AMERICA CIRCUIT SAFETY

Performance-tested and FIA-homologated debris fences/catch fences with high-tensile steel wire. For pit wall and marshal safety.

Contact: +41 78 737 95 64  
[geobruigg.com](http://geobruigg.com)

### RRR PAVEMENT SOLUTIONS (R3) TRACKWALK

TrackWalk is the all-in-one platform for safer, smoother circuit operations. Trusted by world-class circuits around the globe. Digitizes inspections, maintenance, and incident reporting. Provides a single source of truth across the track. Strengthens compliance and boosts safety standards. Builds insurer confidence while reducing costs.

Contact: +443333312097  
[trackwalk.com](http://trackwalk.com)

### UNITED RACE PARTS GREAVES 3D FUEL BOWSER 2.0

Advanced fueling system for race-day efficiency and precision. 200-liter capacity with durable aluminum shell. Real-time mass and temperature data via 12-inch glass touchscreen. 20L/min bi-directional pump with 99% accuracy. ATEX-approved components with emergency stop safety. Compatible with E20 and high-octane fuels.

# WAREHOUSE DISTRIBUTORS

Warehouse distributors can serve as valuable assets to motorsports business operations, a number of which offer multiple locations, same-day shipping, online inventory tracking, customer service reps, and much more. WDs service the industry as the link between parts manufacturers and independent motorsports business operations. View the list of WDs aimed to help motorsports businesses succeed.

# **HYLIFT JOHNSON LIFTERS**

**REQUEST  
YOUR FREE NEW  
CATALOG**

## **DO YOU KNOW WHO MAKES YOURS?**

Hy Lift Johnson Lifter Co., the original Iconic brand, is the only global premier designer and manufacturer of engine lifters. Located in Muskegon, Michigan for over 85 years! We manufacture the most complete line of stock and high performance lifters in the industry! Hydraulic, Mechanical, Roller, Flats, Tie Bar Retro fit and Lash adjusters as well as Slow and Fast Leak Down versions and our Patented EDM Direct Shot® and Patent Pending Dual Float™ Bearing system. All made in the USA where Quality, Performance, Endurance and Engineering still matter!

## **THE ONLY COMPANY THAT DOES IT ALL!**

As Topline celebrates 50 years of supplying quality import engine parts, we look forward to continuing our tradition of building strong relationships with our customers by delivering dependable, reliable service.

Topline truly embodies the spirit of innovation, integrity, trust and excellence. We understand that success doesn't come from what is done occasionally, but from what is done consistently. We pride ourselves on this commitment. Our products are sold and recommended by the most knowledgeable, experienced and trusted engine builders and parts distributors in the world.
