STATEMENT ON THE IMPACT OF MOTORSPORTS

The State of New York has a strong history in motorsports and highly regarded motorsports facilities. The New York Motorsports Coalition (NMMC), represents leading industry professionals at more than 60 venues, multiple product manufacturers, parts distributors and more than 5 million individual enthusiasts who are constituents of the state of New York.

These events include dirt ovals, road racing, paved oval tracks, drag racing venues, tractor pulls and a variety of other forms of outdoor recreation. Our venues are not only outdoor and primarily located in rural/agricultural areas, but they cover large footprints of open space. The smallest racing venues in our state still are larger than other outdoor sporting venues. Our businesses are perfect for functional cells and compartmentalized fan groupings.

The average 1/4-mile short track occupies more real estate than a football, soccer or baseball facility. The average drag racing or road racing venue occupies more real estate than the combined footprint of the state’s largest football, soccer and baseball facilities combined. Our venues are working with the leading motorsports sanctioning bodies including the World Racing Group (WRG), National Hot Rod Association (NHRA), Sports Car Club of America (SCCA) and others to develop industry standards to safely open our venues in gradual steps while protecting our participants, employees and attendees from risk. The same safety standards that were developed by track operators here in New York have been adopted by several other states and are being implemented in a safe and effective manner.

While motorsports venues in the State of New York remain shuttered with no definitive date for reopening, we helplessly are watching as our participants and fans are looking to other states for options. This year, we’ve watched our racers and fans take to the Interstates to race in Pennsylvania, Ohio, Delaware, Maine, and other states. With each passing day we are learning about more events that have been moved from New York to other states. When the event moves, so do our racers and attendees.

Most racers and fans are loyal and willing to drive 5-8 hours to attend events when there are no other options available at home. These racers are participants who have made significant investments in their RVs, haulers and race cars. They will not sit and wait patiently while surrounding states begin to reopen. When they go elsewhere, supporting businesses such as auto parts stores, mechanics, beverage distributors, meat producers, paper providers, convenience stores, and more all lose out on revenue. This causes a significant loss of sales tax revenue that has a ripple effect through the state and local economy.

-2 -

Asking our fans to leave the state in order to support the sport they love is counter-productive to the spread of COVID-19. The current rules in place by the Governor’s order encourage state residents to leave their isolated community, travel great distances, encounter strangers and risk possible exposure in other states and then return home. At present, we are fighting a battle against competing businesses to our west and north, with increased competition from other states.

We are recommending a phased 3 step opening:

<table>
<thead>
<tr>
<th>Step</th>
<th>Date</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Aug 28</td>
<td>Racetracks will be permitted at 40% of total venue capacity for spectator events. Masks and Social distance practices for participants and spectators.</td>
</tr>
<tr>
<td>2.</td>
<td>Sep 19-2020</td>
<td>Racetracks will be permitted to reopen at 70% of total venue capacity for spectator events. Masks and Social distance practices for participants and spectators.</td>
</tr>
<tr>
<td>3.</td>
<td>Jan 1, 2021</td>
<td>Entertainment venues (specifically racetracks) will be permitted to reopen at 100% of total venue capacity for spectator events. Social distance practices for participants and spectators.</td>
</tr>
</tbody>
</table>

Continued closure of New York’s motorsports facilities will be a major financial blow to the motorsport’s venues operating in the State of New York. Multi-generational family businesses will close, small town businesses that rely on the boost of an event night will realize further negative impact and — for the first time in the history of our industry – our customers will be trained to go elsewhere. We are surrounded to the east, west, south and north by other options for our loyal customers. If we can’t open, they will go elsewhere.

Many of our venues have worked for decades to secure events with all of the major motorsports industry sanctioning bodies. Other events that were scheduled at our tracks are now moved or moving to other locations. We all are seasonal businesses and we cannot wait for a what-if possibility for conducting our events. We need adequate time to organize, take responsible steps and properly promote our businesses so that we can take advantage of the plan that we are presenting. Our plan works for individual tracks as well as the industry as a whole. The one-size-fits-all approach for all outdoor events simply is untenable.

As you will see by our proposal, the New York Motorsports Coalition and our tracks are well prepared to take the necessary steps to safely conduct our events. We want to be
NEW YORK MOTORSPORTS
COALITION

responsible stewards of our sport and work with the State of New York on a sensible solution. Following is our four-step, one-year plan to safely operate and educate not only our employees and participants, but also the New York motorsports constituents who are loyal to our sport.
NEW YORK MOTORSPORTS COALITION
OUTDOOR ENTERTAINMENT VENUES
3-STEP REOPENING PLAN

STEP 1 (3 weeks): GRANDSTAND RETURN 40%
Friday August 28, 2020 through Friday, September 18, 2020
Outdoor entertainment venues/motorsports facilities are permitted to reopen with grandstand spectator occupancy limited to 40% of total available seats, based on our adherence to policies regarding attendance limits, public health and safety precautions.

Provided the regional data for the venue location indicate that regional case positivity rate and hospital capacity benchmarks are met, NYMC member tracks will reopen with grandstand spectator occupancy of 40% of total available seats.

Participants will be limited to the driver and twenty (20) crew members. Teams will be restricted to their pit area. No gatherings in groups of 10 or more will be permitted without proper distancing between team spaces.

Strict guidelines established by the NYMC, while working under advisement of our local health agencies, will ensure that all participants are protected from exposure, proper social distancing is followed, extra sanitation and disinfecting is provided, and all food sales will be treated as a ‘to go’ order. Seating areas will be identified with social distancing markings to establish distancing between family groups and functioning cells of attendees.

All attendees will be asked to wear PPE masks while in attendance at the event.

All spectator admission tickets sales will require limited exposure to staff and fellow attendees. NYMC tracks will have masks available for attendees requesting PPE. NYMC member venues will implement social distancing rules for all areas of general seating. Family groups and functioning cells of spectators will be limited to 10 or less in all areas of the main spectator areas.

The three-week period of STEP 1 will provide the NYMC adequate time to host weekly educational conference calls with member outdoor venues to implement all rules and regulations prior to moving to STEP 2 on Friday, September 18.

STEP 2 (Remainder of 2020 season): GRANDSTAND 70%
Friday, September 18 through end of season
NYMC member tracks will host spectator events with an occupancy rate of 70% of total available seats and will continue to adhere to Coalition policies as it pertains to social distancing, attendance limits, public health and safety precautions.

Provided the regional data for the venue location indicate that regional case positivity rate and hospital capacity benchmarks are met in the period of the prior step, NYMC member tracks will host spectator events with an occupancy rate of 70% of total available seats in STEP 2. NYMC member tracks will continue to adhere to Coalition policies as it pertains to social distancing, attendance limits, public health and safety precautions.
STEP 3: Preparation for 2021
Friday, January 1, 2021 forward
NYMC member tracks will fully re-open with Coalition safety precautions continuing. Race events are permitted to open at full capacity with New York Motorsports Coalition guidance and procedures in place for the 2021 season.

The NYMC, while working with motorsports sanctioning bodies and industry health officials, will develop a detailed 2021 Operational Procedures Manual as it applies to infectious disease prevention. The NYMC will host monthly educational conference calls to take the necessary steps to safely open for the 2021 racing season.
NEW YORK MOTORSPORTS COALITION
OUTDOOR ENTERTAINMENT VENUES
REOPENING PLAN

The New York Motorsports Coalition 3-STEP Reopening Plan for Motorsports Outdoor Entertainment Venues has been formulated to work in conjunction with New York states’ regionalized reopening plan. As a seasonal business, we cannot operate without a calendar of events and schedule for resumption of business.

Our submission is based on initial timelines for entry and how it affects our seasonal business which, in most cases, will conclude in October 2020. Our 3-STEP process enables our businesses to reopen and safely operate based on public, safety, health, moral responsibility, public convenience and general prosperity.

Should any NYMC member track’s geographical region advance to beyond Phase 4 earlier than our designated dates, that member track would then be able to resume business under the specific regional and local guidelines as it pertains to their location.

COVID-19 Operational Procedures

The Center of Disease Control and Prevention (CDC) strongly encourages Event Organizers to implement procedures to slow the spread, mitigate resurgence and prepare for the possibility of outbreaks of COVID-19. The New York Motorsports Coalition has created a comprehensive set of Operational Procedures consistent with CDC Guidelines for motorsports events in the state of New York in order to help protect the local communities, participants, staff and spectators. Proper planning, preparation, communication, and follow-through will ensure a safe and successful Event. Facilities shall refer to the State of New York detailed guidelines for approved procedures:

Operational Procedures

- Ensure that all attendees; spectators and participants, and facility personnel maintain 6 ft. of distance from other individuals or groups of people, to the extent possible.
- Ensure that all individuals wear appropriate face coverings when in the venue at all times, except for participants when engaged in competition.
- Multiple Hand Sanitizer units will be strategically spread around the entry points of the facility (Front Gate, Pit Gate, Backstretch)
- All employees will be wearing masks except for some staff that will be communicating via 2-way or 1-way radios. These employees primarily work alone in the flag stand and corner judges. Announcers and race director will be in the announcer’s booth, which is closed off to the public
- Concession workers will wear plastic or nitrile gloves
- Restrooms – We will have an employee who shall monitor and disinfect the main bathrooms.
- Procedural Reminders -We will have signage and PA announcements throughout the facility during the Event reminding ALL attendees of the importance of “Social Distancing”, “Wear your Mask”, “No Groups Larger Than 10”, “Wash Hands Every 20 minutes,” and “Self-Monitor and Please Report any Symptoms to Nearest Staff Member.”
- We will have a text line setup for anyone that has concerns to text their concerns and the event staff will promptly investigate the issue

- Online Ticket Sales
  - Ticket sales will be offered online so we can shorten up the lines getting into the speedway
- Barriers
  - All ticket booths and concessions will have a barrier in front of the pay window
Temperature Scanners
- Temperature scanners may be used to test all attendees entering the facility. Any attendee with a temperature of 100.4 degrees or higher will not be allowed into the facility. Attendees with the temperature of 100.3 or below will be allowed into the facility and should follow all other facility guidelines.

Wristbands
- Fans and drivers will put on their own wristbands

Face Masks
- We will have a supply of face masks for sale for anyone that needs them.

No Pit Meeting Gathering
- All drivers must stay in their pit area for the drivers meeting as it will be done on the PA System

Social Distancing
- Spectators should always practice Social Distancing while at the facility including when in line for tickets and concessions
- We will have 15 of these social distancing signs displayed around our seating areas

Pits – At least 10 feet from center to center on every spot
- Each pit spot is 10 feet from the center of your pit spot to the center of the next pit spot. We will be spreading these pits out, but drivers and pit crews are encouraged to stay in your pit area until it’s your turn to race and then pit crews must use social distancing with other pit crews while watching the race.
